

Let us say

Lesson-6

Multiplication

In the branch there were six flowers.
Each flower has 5 petals
How many total petals are there
Think and tell.

There are 5 baskets with 10 eggs in each
Count and say total number of eggs.

Remember the tables and multiply

Multiply and fill in the boxes

Let us solve

There are 12 mangoes in a basket. How many mangoes will be in 4 such baskets?

$$12 \times 4 = 48$$

Let us see how will you do

Tens	Ones
1	2
	$\swarrow \uparrow$
\times	4
<hr/>	
	8

First step = $2 \times 4 = 8$

Second step = $1 \times 4 = 40$

Third step = $8 + 40 = 48$

4	0
<hr/>	
4	8

There are 48 mangoes in 4 baskets

You can also do in this way

Tens Ones

First step : Multiply 2 by 4 and write it in ones place

Second step : Multiply 1 ten by 4 and write in tens place

First step : Multiply with ones

Second step : Multiply with tens

Do by yourself

Let us understand (Multiplication with Zero)

Let us see how many laddoos are there in the four dishes

No laddoo is there in any of the dish

Therefore, $0+0+0+0 = 0 \times 4 = 0$

This means there is no single laddoo

Lets write

$$0 \times 2 = 0 + 0 = 0$$

$$0 \times 3 = 0 + 0 + 0 = 0$$

$$0 \times 5 = 0 + 0 + 0 + 0 + 0 = 0$$

Let us know : Multiplication of '0' by any number is '0'. Multiplication of any number by '0' is '0'.

Let us multiply

$0 \times 9 = \square \quad 0 \times 13 = \square \quad 0 \times 14 = \square \quad 0 \times 10 = \square$

$10 \times 0 = \square \quad 6 \times 0 = \square \quad 20 \times 0 = \square \quad 7 \times 0 = \square$

Let us solve

How many bananas are there in 5 dozens of banana?

1 dozen = 12

Let us see how we should solve

		$\begin{array}{r} 12 \\ \times 5 \\ \hline \end{array}$
First step	(5×2) 10
Second step	(5×10) 50
Third step	$(10 + 50)$	60

Do by yourself

Sports meet

30 students from Sibsagar came by bus to participate in the sports meet organised at Nagaon district. They took parathas in a hotel at Jakhalabandha. Each of them spent Rs 32 for the food. What was the total expenditure on food?

Solution :

Total number of participants = 30

Expenditure on food items for 1 participant = 32 rupees

Therefore, total expenditure on food items = 30×32 rupees
= 960 rupees

Let us learn

$$30 \times 32 = ?$$

$$\begin{array}{r} 30 \\ \times 32 \\ \hline \end{array}$$

(First step) $30 \times 2 \rightarrow 60$
(Second step) $30 \times 3 \rightarrow 90$

$$\begin{array}{r} 60 \\ 90 \\ \hline 960 \end{array}$$

First step $\rightarrow 30 \times 2 = (3 \text{ tens} + 0 \text{ ones}) \times 2$
 $= (30 + 0) \times 2$
 $= 30 \times 2 + 0 \times 2$
 $= 60 + 0 = 60$

Second step $\rightarrow 30 \times 30 = (3 \text{ tens} + 0 \text{ ones}) \times 30$
 $= (30 + 0) \times 30$
 $= 30 \times 30 + 0 \times 30$
 $= 900 + 0 = 900$

Third step \rightarrow = First step + second step
 $= 60 + 900 = 960$

Alternative solution - you can do this way also

$$\begin{array}{r}
 32 \\
 \times 30 \\
 \hline
 \text{(First step)} \quad 32 \times 0 \rightarrow 0 \\
 \text{(Second step)} \quad 32 \times 3 \rightarrow 96 \\
 \hline
 960
 \end{array}$$

Alternative solution - You can do this way also

$ \begin{array}{r} 30 \\ \times 32 \\ \hline 30 \times 2 \rightarrow 60 \text{ First step} \\ 30 \times 30 \rightarrow 900 \text{ Second step} \\ \hline 960 \end{array} $
--

Here $32 = 30 + 2$

Therefore, first of all, we will

$$30 \times (30 + 2)$$

$$= 30 \times 30 + 30 \times 2$$

First line of multiplication

Second line of multiplication

$$= 900 + 60$$

$$= 960$$

Hormohon's sugarcane field

Hormohon sold 112 numbers of sugarcane everyday from his sugarcane field.
How many sugarcane he sold in 3 days?

Solution :

Number of sugarcane sold in 1 day = 112

Number of sugarcane sold in 3 days = 112×3
= 336

Let us learn

$$112 \times 3 = ?$$

Hundred Tens Ones

Latumoni's Betelnut Garden

Latumoni and others plucked betelnuts from their garden to sell in the market. They kept the betelnuts in 12 baskets with 35 betelnut in each. How many betelnuts did they keep in the baskets altogether.

$$\begin{array}{r} 35 \\ \times 12 \\ \hline \end{array}$$

35 means 30 and 5 = 30 + 5
12 means 10 and 2 = 10 + 2

	30	5
10	30×10 300	5×10 50
2	30×2 60	5×2 10

$$300 + 60 = 360$$

$$50 + 10 = 60$$

$$360 + 60 = 420$$

Therefore, $35 \times 12 = 420$

(a) 35×14

(b) 67×15

(c) 52×15

(d) 44×16

(e) 75×13

(f) 12×23

(h) 37×11

(i) 49×12

Let us fill in the blanks

$$7 \times \dots = 35$$

$$9 \times \dots = 54$$

$$8 \times \dots = 64$$

$$\dots \times 8 = 48$$

$$10 \times \dots = 70$$

$$6 \times 9 = \dots$$

$$5 \times \dots = 30$$

$$\dots \times 7 = 42$$

$$8 \times \dots = 80$$
