

Bank Reconciliation Statement

5

In chapter 4, you have learnt that the business organisations keep a record of their cash and bank transactions in a cash book. The cash book also serves the purpose of both the cash account and the bank account and shows the balance of both at the end of the period.

Once the cash book has been balanced, it is usual to check its details with the records of the firm's bank transactions as recorded by the bank. To enable this check, the cashier needs to ensure that the cash book is completely up to date and a recent bank statement (or a bank passbook) has been obtained from the bank. A bank statement or a bank passbook is a copy of a bank account as shown by the bank records. This enable the bank customers to check their funds in the bank regularly and update their own records of transactions that have occurred. An illustrative bank passbook of a current account is shown in figure 5.1.

The amount of balance shown in the passbook or the bank statement must tally with the balance as shown in the cash book. But in practice, these are usually found to be different. Hence, we have to ascertain the causes for such difference. It will be observed that a bank statement/passbook shows all deposits in the credit column and withdrawals in the debit column. Thus, if deposits exceed withdrawals it shows a credit balance and if withdrawals exceed deposits it will show a debit balance (overdraft).

LEARNING OBJECTIVES

After studying this chapter, you will be able to :

- *state the meaning and need for the preparation of bank reconciliation statement;*
- *identify causes of difference between bank balance as per cash book and pass book;*
- *prepare the bank reconciliation statement;*
- *ascertain the correct bank balance as per cash book;*

5.1 Need for Reconciliation

It is generally experienced that when a comparison is made between the bank balance as shown in the firm's cash book, the two balances do not tally. Hence, we have to first ascertain the causes of difference thereof and then reflect them in a statement called *Bank Reconciliation Statement* to reconcile (tally) the two balances.

In order to prepare a bank reconciliation statement we need to have a bank balance as per the cash book and a bank statement as on a particular day along with details of both the books. If the two balances differ, the entries in both the books are compared and the items on account of which the difference has arisen are ascertained with the respective amounts involved so that the bank reconciliation statement may be prepared. Its format shown in figure 5.5.

It can also be prepared with two amount columns one showing additions (+ column) and another showing deductions (-column). For convenience, we usually adopt this treatment.

Fig. 5.3 : Proforma of bank reconciliation statement (table form)

Reconciliation of the cash book and the bank passbook balances amounts to an explanation of differences between them. The differences between the cash book and the bank passbook is caused by:

- *timing differences* on recording of the transactions.
- *errors* made by the business or by the bank.

5.1.1 Timing Differences

When a business compares the balance of its cash book with the balance shown by the bank passbook, there is often a difference, which is caused by the time gap in recording the transactions relating either to payments or receipts. The factors affecting time gap includes :

5.1.1(a) Cheques issued by the bank but not yet presented for payment

When cheques are issued by the firm to suppliers or creditors of the firm, these are immediately entered on the credit side of the cash book. However, the receiving party may not present the cheque to the bank for payment immediately. The bank will debit the firm's account only when these cheques are actually paid by the bank. Hence, there is a time lag between the issue of a cheque and its presentation to the bank which may cause the difference between the two balances.

5.1.1(b) Cheques paid into the bank but not yet collected

When firm receives cheques from its customers (debtors), they are immediately recorded in the debit side of the cash book. This increases the bank balance as per the cash book. However, the bank credits the customer account only when the amount of cheques are actually realised. The clearing of cheques generally takes few days especially in case of outstation cheques or when the cheques are paid-in at a bank branch other than the one at which the account of the firm is maintained. This leads to a cause of difference between the bank balance shown by the cash book and the balance shown by the bank passbook.

5.1.1(c) Direct debits made by the bank on behalf of the customer

Sometimes, the bank deducts amount for various services from the account without the firm's knowledge. The firm comes to know about it only when the bank statement arrives. Examples of such deductions include: cheque collection charges, incidental charges, interest on overdraft, unpaid cheques deducted by the bank – i.e., stopped or bounced, etc. As a result, the balance as per passbook will be less than the balance as per cash book.

5.1.1(d) Amounts directly deposited in the bank account

There are instances when debtors (customers) directly deposits money into firm's bank account. But, the firm does not receive the intimation from any source till it receives the bank statement. In this case, the bank records the receipts in the firm's account at the bank but the same is not recorded in the firm's cash book. As a result, the balance shown in the bank passbook will be more than the balance shown in the firm's cash book.

5.1.1(e) Interest and dividends collected by the bank

When the bank collects interest and dividend on behalf of the customer, then these are immediately credited to the customers account. But the firm will know about these transactions and record the same in the cash book only when it receives a bank statement. Till then the balances as per the cash book and passbook will differ.

5.1.1(f) Direct payments made by the bank on behalf of the customers

Sometimes the customers give standing instructions to the bank to make some payment regularly on stated days to the third parties. For example, telephone bills, insurance premium, rent, taxes, etc. are directly paid by the bank on behalf of the customer and debited to the account. As a result, the balance as per the bank passbook would be less than the one shown in the cash book.

5.1.1(g) Cheques deposited/bills discounted dishonoured

If a cheque deposited by the firm is dishonoured or a bill of exchange drawn by the business firm is discounted with the bank is dishonoured on the date of maturity, the same is debited to customer's account by the bank. As this information is not available to the firm immediately, there will be no entry in the firm's cash book regarding the above items. This will be known to the firm when it receives a statement from the bank. As a result, the balance as per the passbook would be less than the cash book balance.

5.1.2 Differences Caused by Errors

Sometimes the difference between the two balances may be accounted for by an error on the part of the bank or an error in the cash book of the business. This causes difference between the bank balance shown by the cash book and the balance shown by the bank statement.

5.1.2(a) Errors committed in recording transaction by the firm

Omission or wrong recording of transactions relating to cheques issued, cheques deposited and wrong totalling, etc., committed by the firm while recording entries in the cash book cause difference between cash book and passbook balance.

5.1.2(b) Errors committed in recording transactions by the bank

Omission or wrong recording of transactions relating to cheques deposited and wrong totalling, etc., committed by the bank while posting entries in the passbook also cause differences between passbook and cash book balance.

Test Your Understanding - I

- I. Read the following transactions and identify the cause of difference on the basis of time gap or errors made by business firm/bank. Put a sign (✓) for the correct cause.

S.No.	Transactions	Time Gap	Errors made by business/bank
1.	Cheques issued to customers but not presented for payment.		
2.	Cheque amounting to Rs. 5,000 issued to M/s. XYZ but recorded as Rs. 500 in the cash book.		
3.	Interest credited by the bank but yet not recorded in the cash book.		
4.	Cheque deposited into the bank but not yet collected by the bank.		
5.	Bank charges debited to firm's current account by the bank.		

II. Fill in the blanks :

- (i) Passbook is a copy of.....as it appears in the ledger of the bank.
- (ii) When money is withdrawn from the bank, the bank the account of the customer.
- (iii) Normally, the cash book shows a debit balance, passbook showsbalance.
- (iv) Favourable balance as per the cash book meansbalance in the bank column of the cash book.

- (v) If the cash book balance is taken as starting point the items which make the cash book balance smaller than the passbook must befor the purpose of reconciliation.
- (vi) If the passbook shows a favourable balance and if it is taken as the starting point for the purpose of bank reconciliation statement then cheques issued but not presented for payment should beto find out cash balance.
- (vii) When the cheques are not presented for payment, favourable balance as per the cash book isthan that of the passbook.
- (viii) When a banker collects the bills and credits the account passbook overdraft showsbalance.
- (ix) If the overdraft as per the passbook is taken as the starting point, the cheques issued but not presented are to bein the bank reconciliation statement.
- (x) When the passbook balance is taken as the starting point items which makes the passbook balancethan the balance in the cash book must be deducted for the purpose of reconciliation.

5.2 Preparation of Bank Reconciliation Statement

After identifying the causes of difference, the reconciliation may be done in the following two ways:

- (a) Preparation of bank reconciliation statement without adjusting cash book balance.
- (b) Preparation of bank reconciliation statement after adjusting cash book balance.

It may be noted that in practice, the bank reconciliation statement is prepared after adjusting the cash book balance, about which you will study later in the chapter.

5.2.1 Preparation of Bank Reconciliation Statement without adjusting Cash Book Balance

To prepare bank reconciliation statement, under this approach, the balance as per cash book or as per passbook is the starting item. The debit balance as per the cash book means the balance of deposits held at the bank. Such a balance will be a credit balance as per the passbook. Such a balance exists when the deposits made by the firm are more than its withdrawals. It indicates the *favourable balance as per cash book or favourable balance as per the passbook*. On the other hand, the credit balance as per the cash book indicates *bank overdraft*. In other words, the excess amount withdrawn over the amount deposited in the bank. It is also known as *unfavourable balance as per cash book or unfavourable balance as per passbook*.

We may have four different situations while preparing the bank reconciliation statement. These are :

1. When debit balance (favourable balance) as per cash book is given and the balance as per passbook is to be ascertained.
2. When credit balance (favourable balance) as per passbook is given and the balance as per cash book is to be ascertained.
3. When credit balance as per cash book (unfavourable balance/overdraft balance) is given and the balance as per passbook is to be ascertained.
4. When debit balance as per passbook (unfavourable balance/overdraft balance) is given and the cash book balance as per is to be ascertained.

5.2.1(a) Dealing with favourable balances

The following steps may be initiated to prepare the bank reconciliation statement:

- (i) The date on which the statement is prepared is written at the top, as part of the heading.
- (ii) The first item in the statement is generally the balance as shown by the cash book. Alternatively, the starting point can also be the balance as per passbook.
- (iii) The cheques deposited but not yet collected are deducted.
- (iv) All the cheques issued but not yet presented for payment, amounts directly deposited in the bank account are added.
- (v) All the items of charges such as interest on overdraft, payment by bank on standing instructions and debited by the bank in the passbook but not entered in cash book, bills and cheques dishonoured etc. are deducted.
- (vi) All the credits given by the bank such as interest on dividends collected, etc. and direct deposits in the bank are added.
- (vii) Adjustment for errors are made according to the principles of rectification of errors. (The rectification of errors has been discussed in detail in chapter 6.)
- (viii) Now the net balance shown by the statement should be same as shown by the passbook.

It may be noted that treatment of all items shall be the reverse of the above if we adjust passbook balance as the starting point. (see illustration 3)

The following solved illustrations will help you understand dealing with favourable balance as per cash book and passbook.

5.2.1(b) Dealing with overdrafts

So far we have dealt with bank reconciliation statement where bank balances has been positive – i.e., there has been money in the bank account. However, businesses sometimes have overdrafts at the bank. Overdrafts are where the bank account becomes negative and the businesses in effect have borrowed from the bank. This is shown in the cash book as a credit balance. In the bank statement, where the balance is followed by Dr. (or sometimes OD) means that there is an overdraft and called debit balance as per passbook.

An overdraft is treated as negative figure on a bank reconciliation statement. The following solved illustration will help you understand the preparation of bank reconciliation statement when there is an overdraft.

Illustration 4

On March 31, 2017, Rakesh had on overdraft of Rs. 8,000 as shown by his cash book. Cheques amounting to Rs. 2,000 had been paid in by him but were not collected by the bank. He issued cheques of Rs. 800 which were not presented to the bank for payment. There was a debit in his passbook of Rs. 60 for interest and Rs. 100 for bank charges. Prepare bank reconciliation statement.

Select the Correct Answer:

1. A bank reconciliation statement is prepared by :
(a) Creditors (b) Bank
(c) Account holder in a bank (d) Debtors
2. A bank reconciliation statement is prepared with the balance :
(a) Passbook (b) Cash book
(c) Both passbook and cash book (d) None of these
3. Passbook is a copy of :
(a) Copy of customer Account (b) Bank column of cash book
(c) Cash column of cash book (d) Copy of receipts and payments
4. Unfavourable bank balance means :
(a) Credit balance in passbook (b) Credit balance in cash book
(c) Debit balance in cash book (d) None of these
5. Favourable bank balance means :
(a) Credit balance in the cash book (b) Credit balance in passbook
(c) Debit balance in the cash book (d) Both b and c
6. A bank reconciliation statement is mainly prepared for :
(a) Reconcile the cash balance of the cash book.
(b) Reconcile the difference between the bank balance shown by the cash book and bank passbook
(c) Both a and b
(d) None of these

5.2.2 Preparation of Bank Reconciliation Statement with Adjusted Cash Book

When we look at the various items that normally cause the difference between the passbook balance and the cash book balance, we find a number of items, which appear only in the passbook. Why not first record such items in the cash book to work out the adjusted balance (also known as amended balance) of the cash book and then prepare the bank reconciliation statement. This shall reduce the number of items responsible for the difference and have the correct figure of balance at bank in the balance sheet. In fact, this is exactly what is done in practice whereby only those items which cause the difference on account of the time gap in recording appear in bank reconciliation statement. These are as (i) cheques issued but not yet presented, (ii) cheques deposited but not yet collected, and (iii) due to an error in the passbook. The step wise preparation of bank reconciliation statement is shown in figure 5.4.

Do it Yourself

You are a trainee accountant for Kamraj Limited, a small printing company. One of your tasks is to enter transactions in the company's cash book, check the entries on receipt of the bank statement, update the cash book and make any amendments as necessary. You are then asked to prepare a bank reconciliation statement at the end of the month.

The company's cash book (showing the bank money columns only) and the bank statement are given on page no. 169 (refer exhibit 1).

You are required to :

- compare the cash book with the bank statement as on August 31, 2014 (refer exhibit 2 on page no. 169).
- Make the entries necessary to update the cash book.
- Calculate the adjusted bank balance as per cash book.

2. As accounts assistant for Chinnar Limited your main task is to enter transactions into the company's cash book, check the entries against the bank statement and prepare a monthly bank reconciliation statement. The cash book (showing the bank money columns only) and bank statement for October 2014 are set out below.

You are required to :

- Reconcile the cash book with the bank statement.
- Make the entries necessary to update the cash book.
- Balance the bank columns of the cash book and calculate the revised bank balance.
- Start with the balance as per the cash book, list any unpresented cheques and sub-total on the reconciliation statement.
- Enter details of bank lodgements.
- Calculate the balance as per the bank statement and check your total against the bank statement for accuracy.
