Efforts need to be put in to decongest the roads. Although the introduction of Delhi Metro has helped ease the traffic on the roads, its reach is still limited. In order to reduce the traffic snarls, the network of the metro must be spread like a web.

Answer:

Child Labour

By XYZ

Child labour is a worm that is slowly eating up the lives of thousands of children across the world. It is difficult to imagine how small children can be forced to carry load or work in stalls or factories.

Poor people, especially those who lack adequate resources to feed their children, make their children work in small factories, restaurants, hotels houses etc. in order to support the household. Most of the children who are forced to do manual labour are deprived of their basic right to education.

The Indian Parliament passed the Child Labour (Prohibition and Abolition) Act in 1986. However, no amount of legislation can do away with this evil until and unless people are sensitized about this issue. Parents who send their children to work must be discouraged from doing so and all those who employ children must be brought to the book. The issue of child labour needs sensitive handling as it pertains to the future of India.
