Section – A (20 Marks) Reading Skills

1. Read the following text : 10 M

- (1) Fossil fuels (oil, coal, and natural gas) are our most traditional sources for power generation. The energy that's produced from any source other than fossil fuels is termed as alternative energy. Between the two sources, using alternative energy has a lower environmental impact.
- (2) We now know that alternative energy sources are the sources we use to supplement or even replace traditional energy sources used for power generation. You could almost say the same thing about renewable energy sources. But there is one subtle difference between the two. All renewable energy sources fall under the category of alternative energy sources, but it doesn't work the other way around.
- (3) That's because renewable energy sources are derived from naturally replenished sources or processes of Earth, such as the sun, wind, and water. We refer to these resources as renewable or sustainable since, unlike fossil fuels, this naturally occurring continual renewal makes them inexhaustible. However, alternative energy sources are exhaustible, and therefore not renewable. That's the difference !
- (4) The equipment necessary to harness energy from alternative sources used to be so expensive that it wasn't practical for consumer use. However, thanks to increased demand, more experienced energy developers, competitive supply chains, improved renewable technologies, and enhanced energy efficiency capabilities, that's no longer the case.

- (5) When it comes to energy efficiency, the leader of the renewable energy pack is wind energy. Behind wind comes geothermal energy, hydropower, nuclear energy, and then solar power. Wind power serves both individuals and entire communities. It is versatile, and can be produced from small-scale windmills or wind turbines on residential properties. It can also be produced from large-scale offshore wind farms in the ocean.
- (6) We generate geothermal power by tapping into underground reservoirs of hot water and steam. Geothermal electricity can directly heat and cool buildings. Generated from the energy of moving water, hydroelectricity (also known as hydropower) is produced when water behind a dam causes turbine blades to move as it flows through an intake. The turbine blades then rotate a generator to produce electricity that is sent to power homes.
- (7) Nuclear energy is created in the form of heat through the fission process of atoms. The initial fission process creates energy and triggers a chain reaction that repeats the process and generates more energy. In nuclear power plants, the heat that fission produces creates steam. The steam then rotates a turbine, which leads to the production of electricity.
- (8) Solar power most commonly refers to the use of solar cells to create energy. On a small scale, you may see a few solar panels on a house roof used to produce energy for just that one home. On a larger scale, you may see a solar farm used as a power plant to produce electricity for its consumers.

Answer the following questions, based on the above passage :

- (i) Which of the following statements best describes the difference between renewable energy sources and alternate energy sources ?
- (A) Alternative energy sources are more expensive than renewable energy sources.
- (B) Renewable energy sources are inexhaustible whereas alternate energy sources could be exhaustible.
- (C) Alternative energy sources are as renewable as renewable energy sources.
- (D) Renewable energy sources are exhaustible but alternative energy sources are inexhaustible.

1

- (ii) What is the tone of the writer in the given lines from para (4) ? Rationalise your response in about 40 words. 2
“However, thanks to increased demand, more experienced energy developers, competitive supply chains, improved renewable technologies, and enhanced energy efficiency capabilities, that’s no longer the case”.
- (iii) Complete the sentence appropriately : 1
In the past, alternative energy sources were not used much by the consumers because _____.
- (iv) The passage includes some words that are opposites of each other. From the sets (a) to (e) below, identify two sets of antonyms : 1
(a) generate and produce (b) exhaustible and inexhaustible
(c) subtle and versatile (d) power and energy
(e) sustainable and exhaustible
- (v) Who is the leader of renewable energy pack and why ? 1
- (vi) Based on the reading of the passage, examine, in about 40 words, the difference between geothermal electricity and hydroelectricity. 2
- (vii) What is the message conveyed by the passage ? 1
(A) Only those energy sources should be used which are renewable.
(B) Wind energy is a renewable as well as inexhaustible source of energy.
(C) There are plenty of renewable energy sources that can be used to replace traditional energy sources.
(D) Alternative energy sources are the emerging energy trends and are still evolving.
- (viii) State whether the following statement is **True** or **False** with reference to the given extract. 1
Hydroelectricity as a renewable energy source is used for residential as well as commercial purposes.

2. Read the passage given below : 10 M
- (1) Mango (*Mangifera indica*) is Asia’s most popular fruit, and it has gained popularity around the world. It has long been a component of culture and religion as a useful and tasty fruit. In addition to taste, it has many good qualities thus making it to be called as “King of Fruits”. Major mango-growing states in India include Andhra Pradesh, Uttar Pradesh, Karnataka, Bihar, Gujarat and Tamil Nadu. Andhra Pradesh and Uttar Pradesh are the leading states in mango production.

- (2) Mango is grown in an area of 5.58 million hectares of area in the world. India is the largest producer of mangoes with 46.02 and 45.88 percent of the total world area and production, respectively. However, India being the major shareholder in terms of mango production, exports only 0.52% of its total production indicating the huge gap in exporting of mangoes. Peru exports about 46%, Thailand 24%, Mexico 18% and Brazil 11% of their total mango production. These countries are the bigger challenges for Indian mango exports. Hence, efforts are needed to evolve cheap transportation mechanism, increase the trade agreements with major importing countries and enhance the productivity.
- (3) The top importing country is United States of America, however, India exports only two percent of its total exports to the USA. The USA, European countries, the UK, Malaysia and Russia can be the other hotspots where India can target to export the mangoes. The critical issue for exporting to the USA is transportation cost (due to sea route distance) and limited shelf life of mango, while for Europe transportation costs as well as competition by African countries are the major hurdles.

The following chart shows the major export destinations of Indian mangoes in 2019-20 :

Table :

Major Export Destination of Indian Mangoes in 2019-20 :

S. No.	Country	Percentage
1.	U.S.A.	2
2.	Kuwait	2
3.	Saudi Arabia	3
4.	Qatar	6
5.	Bangladesh	6
6.	Oman	7
7.	U.K.	9
8.	Nepal	24

<p style="text-align: center;">Marking Scheme Strictly Confidential (For Internal and Restricted use only) Secondary School Examination, 2024 SUBJECT NAME ENGLISH LANGUAGE AND LITERATURE) (184) (Q.P. CODE – 2/2/1)</p>	
General Instructions: -	
1	You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.
2	“Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, evaluation done, and several other aspects. Its leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in News Paper/Website etc may invite action under various rules of the Board and IPC.”
3	Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one’s own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and due marks be awarded to them. In class-X, while evaluating two competency-based questions, please try to understand given answer and even if reply is not from marking scheme but correct competency is enumerated by the candidate, due marks should be awarded.
4	The Marking scheme carries only suggested value points for the answers. These are in the nature of Guidelines only and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the due marks should be awarded accordingly.
5	The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. If there is any variation, the same should be zero after deliberation and discussion. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
6	Evaluators will mark(✓) wherever answer is correct. For wrong answer CROSS ‘X’ be marked. Evaluators will not put right (✓) while evaluating which gives an impression that answer is correct and no marks are awarded. This is the most common mistake which evaluators commit.
7	If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totalled up and written in the left-hand margin and encircled. This may be followed strictly.
8	If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.

9	If a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out with a note “ Extra Question ”.
10	No marks to be deducted for the cumulative effect of an error. It should be penalized only once.
11	A full scale of marks _____(example 0 to 80/70/60/50/40/30 marks as given in Question Paper) has to be used. Please do not hesitate to award full marks if the answer deserves it.
12	Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours every day and evaluate 20 answer books per day in main subjects and 25 answer books per day in other subjects (Details are given in Spot Guidelines). This is in view of the reduced syllabus and number of questions in question paper.
13	<p>Ensure that you do not make the following common types of errors committed by the Examiners in the past:-</p> <ul style="list-style-type: none"> • Leaving answer or part thereof unassessed in an answer book. • Giving more marks for an answer than assigned to it. • Wrong totalling of marks awarded on an answer. • Wrong transfer of marks from the inside pages of the answer book to the title page. • Wrong question wise totaling on the title page. • Wrong totaling of marks of the two columns on the title page. • Wrong grand total. • Marks in words and figures not tallying/not same. • Wrong transfer of marks from the answer book to online award list. • Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.) • Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
14	While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0) Marks.
15	Any un assessed portion, non-carrying over of marks to the title page, or totalling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
16	The Examiners should acquaint themselves with the guidelines given in the “ Guidelines for spot Evaluation ” before starting the actual evaluation.
17	Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totalled and written in figures and words.
18	The candidates are entitled to obtain photocopy of the Answer Book on request on payment of the prescribed processing fee. All Examiners/Additional Head Examiners/Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.
