

RACE # 01**ENDOCRINE SYSTEM****BIOLOGY**

1. Which hormone stimulate the adrenal cortex to release glucocorticoids :
(A) TSH (B) FSH (C) Cortisone (D) ACTH
2. Posterior part of pituitary gland is known as :
(A) Adeno hypophysis (B) Hypophysis cerebri (C) Neuro hypophysis (D) None of these
3. Which gland controls metamorphosis in amphibians?
(A) Pituitary (B) Adernal cortex (C) Thyroid (D) None of these
4. Insulin hormone is secreted by :
(A) Thyroid (B) Pitutary (C) Islets of pancreas (D) None of these
5. Which hormone enhances the absorption of calcium from intestine :
(A) Thyroxine (B) Growth hormone (C) Parathormone (D) None of these
6. B.M.R. stands for :
(A) Basic Mortality Rate (B) Basal Metabolic Rate (C) Basic Matter Rythm (D) Broad Material Rate
7. An example of ductless gland is :
(A) Lacrimal (B) Adrenal (C) Salivary (D) Gastric
8. An endocrine system is a :
(A) System of electrical impulses to transmit messages (B) collection of glands that produce hormones
(C) Collection of nerves that produce reflexes (D) None of these
9. Iodine salt is necessary for our body because it :
(A) Maintains sugar level in human body
(B) Makes androgen hormones
(C) Makes thyroxin hormone
(D) Maintains level of follide stimulating hormone (FSH)
10. The sugar level in the blood is controlled by :
(A) Oestrogen (B) Thyroxine (C) Insulin (D) Pepsin
11. Adrenal glands are located above :
(A) Kidneys (B) Lungs (C) Intestine (D) Stomach
12. All of the following are endocrine glands except :
(A) Pituitary (B) Thyroid (C) Ovary (D) Sweat glands
13. Iodine is necessary for the optimum action of an endocrine gland called :
(A) Gonads (B) Hypothalamus (C) Thymus (D) Thyroid
14. Hormones released through endocrine glands are poured into :
(A) Pancreas (B) Brain (C) Intestine (D) Blood stream
