34. निम्नलिखित गद्य को ध्यानपूर्वक पढ़िए :

समकालीन विश्व में जहाँ सतत विकास को लेकर बहुत सारी चिंताएँ हैं, हरित विकास तथा शुद्ध शून्य उत्सर्जन ऐसी दो महत्त्वपूर्ण अवधारणाएँ हैं जिनकी आमतौर पर एक साथ चर्चा की जाती है । ये दो अवधारणाएँ पृथ्वी के भविष्य के लिए अतिसंवेदनशील हैं, क्योंकि इन पर एक साथ काम करके, हम अपने लिए तथा आने वाली पीढ़ियों के लिए एक अधिक स्थायी भविष्य का निर्माण कर सकते हैं ।

हरित विकास उस आर्थिक विकास को संदर्भित करता है "जो पर्यावरणीय प्रभाव को कम करने के तरीके से हासिल किया गया है," जबकि, "शुद्ध शून्य उत्सर्जन ग्रीनहाउस गैसों के मानवजनित उत्सर्जन व वायुमंडल से ऐसे उत्सर्जन को हटाने के बीच संतुलन प्राप्त करने की स्थिति है।"

दोनों अवधारणाओं के बीच एक मजबूत संबंध मौजूद है :

- (1) हरित विकास ग्रीनहाउस गैस उत्सर्जन को कम करने में सहायक है, जो शुद्ध शून्य उत्सर्जन प्राप्त करने के लिए आवश्यक है।
- (2) हरित विकास नौकरियाँ उत्पन्न करने में व आर्थिक विकास को प्रोत्साहित करने में सहायक है, जो देशों के लिए शुद्ध शून्य उत्सर्जन प्रौद्योगिकी में निवेश को अधिक किफायती बनाने में सहायता कर सकता है।

एक राष्ट्र इन दोनों कारकों को एक साथ वृद्धि देने के लिए बहुत कुछ कर सकता है, जैसे :

- (क) नवीकरणीय ऊर्जा स्रोतों में निवेश, जो ग्रीनहाउस गैसों का उत्पादन नहीं करते हैं।
- (ख) ऊर्जा कुशल उपायों को अपनाना जैसे इन्सुलेशन और अन्य ऐसे उपकरण जो ऊर्जा की खपत को कम करने में मदद कर सकते हैं ।
- (ग) परिवहन की आदतों में परिवर्तन जैसे पैदल चलना, साइकिल चलाना व सार्वजनिक परिवहन का उपयोग करना, क्योंकि ये यात्रा करने के लिए अल्प-कार्बन उत्सर्जन वाले तरीके हैं ।

दिए गए गद्य व सामान्य ज्ञान के आधार पर, निम्नलिखित प्रश्नों के उत्तर दीजिए :

- (i) हरित विकास व शुद्ध शून्य उत्सर्जन का अर्थ बताइए ।
- (ii) हरित विकास और शुद्ध शून्य उत्सर्जन के बीच अंतर्संबंध पर संक्षेप में चर्चा कीजिए।
- (iii) शुद्ध शून्य उत्सर्जन को प्रोत्साहित करने वाले किसी एक कारक को सोदाहरण स्पष्ट कीजिए।

34. Read the following text carefully :

In the contemporary world with a lot of sustainable development concerns, green growth and net zero emissions are two important concepts which are generally discussed together. These two concepts are essential for the future of the Earth, as by working together on them we can create a more sustainable future for ourselves and for the generations to come.

Green growth refers to, "the economic growth that is achieved in a way that minimizes environmental impact," whereas, "net zero emission is the state of achieving balance between anthropogenic emission of greenhouse gases and removal of such emissions from the atmosphere."

There exists a robust connection between the two concepts :

- (1) Green growth can help to reduce greenhouse gas emissions, which is essential for achieving net zero emissions.
- (2) Green growth can help to create jobs and boost economic growth, which can help to make it more affordable for countries to invest in net zero emissions technology.

A nation can do a lot to promote these two factors together, like :

- (a) Investing in renewable energy sources which do not produce greenhouse gases.
- (b) Adopting energy efficient measures, such as insulation and other such appliances which can help to reduce energy consumption.
- (c) Altering transportation habits, like adopting walking, biking and using public transportation as they are lower-carbon ways to travel.

On the basis of the given text and common understanding, answer the following questions :

- (i) State the meaning of green growth and net zero emissions.
- (ii) Discuss briefly the interconnection between green growth and net zero emissions.
- (iii) Illustrate any one factor to promote net zero emission.

	ECONOMICS (SUBJECT CODE – 030)
Conoral In	(PAPER CODE – 58/3/2) astructions: -
<u> </u>	You are aware that evaluation is the most important process in the actual and
1	correct assessment of the candidates. A small mistake in evaluation may lead to
	serious problems which may affect the future of the candidates, education system
	and teaching profession. To avoid mistakes, it is requested that before starting
	evaluation, you must read and understand the spot evaluation guidelines carefully.
2	"Evaluation policy is a confidential policy as it is related to the confidentiality
_	of the examinations conducted, Evaluation done and several other aspects.
	Its' leakage to public in any manner could lead to derailment of the
	examination system and affect the life and future of millions of candidates.
	Sharing this policy/document to anyone, publishing in any magazine and
	printing in News Paper/Website etc may invite action under various rules of
	the Board and IPC."
3	Evaluation is to be done as per instructions provided in the Marking Scheme. It
	should not be done according to one's own interpretation or any other
	consideration. Marking Scheme should be strictly adhered to and religiously
	followed. However, while evaluating, answers which are based on latest
	information or knowledge and/or are innovative, they may be assessed for
	their correctness otherwise and due marks be awarded to them. In Class XII,
	while evaluating competency-based questions, please try to understand
	given answer and even if reply is not from marking scheme but correct
	competency is enumerated by the candidate, due marks should be awarded.
4	The Marking scheme carries only suggested value points for the answers. These
	are in the nature of Guidelines only and do not constitute the complete answer.
	The students can have their own expression and if the expression is correct, the
-	due marks should be awarded accordingly.
5	The Head-Examiner must go through the first five answer books evaluated by each
	evaluator on the first day, to ensure that evaluation has been carried out as per the
	instructions given in the Marking Scheme. If there is any variation, the same should
	be zero after delibration and discussion. The remaining answer books meant for
	evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
6	Evaluators will mark($$) wherever answer is correct. For wrong answer CROSS 'X"
U	be marked. Evaluators will not put right (✓) while evaluating which gives an
	impression that answer is correct and no marks are awarded. This is most
	common mistake which evaluators are committing.
l	common motario milon evaluators are committing.

7	If a question has parts, please award marks on the right-hand side for each part.
	Marks awarded for different parts of the question should then be totaled up and
	written in the left-hand margin and encircled. This may be followed strictly.
8	If a question does not have any parts, marks must be awarded in the left-hand
	margin and encircled. This may also be followed strictly.
9	If a student has attempted an extra question, answer of the question deserving
	more marks should be retained and the other answer scored out with a note "Extra Question".
10	No marks to be deducted for the cumulative effect of an error. It should be
10	penalized only once.
11	A full scale of marks 80 has to be used. Please do not hesitate to award full marks
	if the answer deserves it.
12	Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours every day and evaluate 20 answer books per day in main subjects and 25 answer books per day in other subjects (Details are given in Spot Guidelines).
13	Ensure that you do not make the following common types of errors committed by the Examiner in the past:- Giving more marks for an answer than assigned to it.
	 Wrong totaling of marks awarded on an answer. Wrong transfer of marks from the inside pages of the answer book to the title page. Wrong question wise totaling on the title page.
	 Leaving answer or part thereof unassessed in an answer book. Wrong totaling of marks of the two columns on the title page. Wrong grand total. Marks in words and figures not tallying/not same.
	 Wrong transfer of marks from the answer book to online award list. Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.)
	Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
14	While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0)Marks.
15	Any un assessed portion, non-carrying over of marks to the title page, or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
16	The Examiners should acquaint themselves with the guidelines given in the "Guidelines for spot Evaluation" before starting the actual evaluation.
17	Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totaled and written in figures and words.
18	The candidates are entitled to obtain photocopy of the Answer Book on request on payment of the prescribed processing fee. All Examiners/Additional Head Examiners/Head Examiners are once again reminded that they must ensure that evaluation is carried out strictly as per value points for each answer as given in the Marking Scheme.

(ii)	divided by population. It is represented in percentage. Worker Population Ratio is an indicator which is used for analysing the employment situation in the country. This ratio is useful in knowing the proportion of population that is actively contributing to the production of goods and services of a country. Higher the worker population ratio, higher the engagement of people in economic activities and vice versa. State the meaning of 'Disguised Unemployment'. Ans. Disguised unemployment refers to a situation when the person seems to be employed but is not contributing to the output i.e., the marginal productivity of labour is zero.						2 1 4

(b) (i)	State and elaborate whether the following statements are <i>true</i> or <i>false</i> , with valid arguments: In the recent past, the Government of India has taken crucial steps, like Jan-Dhan Yojana, for efficient allocation of financial resources.	
	Ans. True. The Government of India has implemented schemes like Jan-Dhan Yojana, which has promoted thrift habits and efficient allocation of financial resources. The formal banking system has been benefitted by mobilization of a substantial amount under this yojana.	2
(ii)	Cooperatives play a vital role in the credit availability in rural India. Ans. True. Cooperatives play a pivotal role in the availability of credit in rural India. They offer accessible financial services to farmers, small businesses, and individuals, bridging gaps left by formal banking institutions. With lower transaction costs, resource pooling and risk-sharing, they provide vital credit support, empowering rural communities and fostering economic growth.	2
33.	"Every coin has two sides - debate over farm subsidies is one such classic example of the	4
(a)	same."	
(i)	Justify the given statement with two arguments each in favour of and against the continuation of the farm subsidies.	
	Ans. The introduction of farm subsidies had been an opinionated step taken by the	
	Government of India. Arguments in favour of continuing farm subsidies:	
	 Eliminating subsidies may increase inequalities of income between rich and poor 	
	farmers.	
	• Most farmers (small and marginal) may not be able to afford expensive agricultural inputs without subsidies.	3
	Arguments against farm subsidies:	
	• It is often argued that farm subsidies have helped the fertilizer industry much more than helping the needy farmers.	
	 Economists argue that subsidies are a huge burden on government's finances. 	
(ii)	"Suez Canal was used as a highway between India and Britian." Justify the given statement with valid arguments.	
	Ans. Opening of the Suez Canal provided a direct and shorter trade route for ships operating between Britain and India and avoided the need to sail around Africa. It intensified British control over India's foreign trade as it reduced the cost of transportation and made access to the Indian market easier. Hence, the Suez Canal was used by the colonial government as a highway to transport goods between India and Britain. (To be marked as a whole)	3
(b)	"India's inward locking trade policy during the post independence period was well supported.	6
(b) (i)	"India's inward looking trade policy during the post-independence period was well supported by various tariff and non-tariff barriers." Do you agree with the given statement? Justify your answer with valid arguments. Ans. Yes. India's inward looking trade policy focused on promoting domestic production and reducing reliance on imports. This was achieved through the imposition of tariffs on imported goods, making imports expensive and thereby reducing their demand in the domestic market. Furthermore, non-tariff barriers were levied to restrict the quantity of imported goods, with an aim to shield the domestic firms from foreign competition. (To be marked as a whole)	3

(ii)	"Navratna policy has facilitated the maintenance, promotion and disinvestment of Public Sector Undertakings (PSUs)." Justify the given statement with valid explanation. Ans. In the post-reform period, Government of India devised Navratna Policy for Public Sector Undertakings (PSUs) with an objective to improve efficiency, infuse professionalism and enable them to compete more effectively in the liberalised global environment. Under this policy, the government partly disinvested some PSUs. However, some PSUs were granted greater managerial and operational autonomy and allowed PSUs to raise resources by themselves from financial markets. (To be marked as a whole)	3

34.	 Read the following text carefully: In the contemporary world with a lot of sustainable development concerns, green growth, and net zero emissions are two important concepts which are generally discussed together. These two concepts are essential for the future of the Earth, as by working together on them we can create a more sustainable future for ourselves and for the generations to come. Green growth refers to, "the economic growth that is achieved in a way that minimizes environmental impact", whereas, "net zero emission is the state of achieving balance between anthropogenic emission of greenhouse gases and removal of such emissions from the atmosphere." There exists a robust connection between the two concepts: (1) Green growth can help to reduce greenhouse gas emissions, which is essential for achieving net zero emissions. (2) Green growth can help to create jobs and boost economic growth, which can help to make it more affordable for countries to invest in net zero emissions technology. A nation can do a lot to promote these two factors together, like: (a) Investing in renewable energy sources which do not produce greenhouse gases. (b) Adopting energy efficient measures, such as insulation and other such appliances which can help to reduce energy consumption. (c) Altering transportation habits, like adopting walking, biking and using public transportation as they are lower-carbon ways to travel. 	
	On the basis of the given text and common understanding, answer the following questions: State the meaning of green growth and net zero emissions. Ans. Green growth refers to the economic growth that is achieved in a way that minimizes	1
	environmental impact. Net zero emission refers to the state of achieving balance between anthropogenic emission of greenhouse gases and removal of such emissions from the atmosphere.	1
(ii)	 Discuss briefly the interconnection between green growth and net zero emissions. Ans. There exists a robust connection between green growth and net zero emissions: Green growth can help to reduce greenhouse gas emissions, essential for achieving net zero emissions. Green growth can help to create jobs and boost economic growth, to make it more affordable for countries to invest in net zero emissions technology. 	1 ½ 1 ½
(iii)	affordable for countries to invest in net zero emissions technology. Illustrate any one factor to promote net zero emission. Ans. A nation can invest in renewable energy sources which do not produce greenhouse	1
