SECTION A
Reading Skills

20 marks

1. Read the following passage carefully :

- 1 Organic food is very popular these days. It can also be very expensive. Some organic food costs twice as much as non-organic food. Parents of young children and even some pet owners, will pay high prices for organic food if they think it is healthier. But many others think organic food is just a waste of money.
- 2 There is one main difference between organic and non-organic food. Organic farms do not use agricultural chemicals such as pesticides that stop insects from damaging crops. In many countries, foods that claim to be organic must have special labels that guarantee they're grown organically.
- 3 Some people think organic also means 'locally grown' and originally it was indeed true. But over a period of time organic farming has become a big business, with many organic foods now being grown by large agricultural companies that sell their products far from where they're grown. Processed food made with organic ingredients has also become more popular. At first, only small companies produced these products. But as demand overtook supply, big food companies that had been selling non-organic products for many years also began selling organic products.
- 4 Is organic food safer and more nutritious ? This is an important part of the debate. Many farmers and consumers believe it is safer and more nutritious. They think agricultural chemicals can cause serious illnesses such as cancer, but there isn't much evidence proving this is true. However, recent studies have shown that eating organically-grown produce reduces your chances of developing heart diseases. Many doctors think it is more important to stop dangerous bacteria from contaminating foods. These bacteria can contaminate both organic and non-organic fruits and vegetables, and doctors recommend washing produce carefully before eating it. Meat, fish and chicken can also become contaminated so washing your hands before handling these foods is also very important.

Based on your understanding of the passage, answer the questions given below :

10×1=10

- (i) People are willing to pay high prices for organic food because
- (a) it is not easily available.
 - (b) it helps in weight loss.
 - (c) it is produced by small companies.
 - (d) it does not contain agricultural chemicals.
- (ii) Select the option that displays what the writer projects with reference to the following :
- Is organic food safer and more nutritious ? This is an important part of the debate.

2. Read the following passage carefully :

- 1 According to a new study, a vast blanket of pollution stretching across South Asia is cutting down sunlight by 10 per cent over India, damaging agriculture, modifying rainfall patterns and putting hundreds of thousands of people at risk.
- 2 It is said, "Acids in the haze may, by falling as acid rain, have the potential to damage crops and trees. Ash falling on leaves can aggravate the impact of reduced sunlight on the Earth's surface. The pollution that is forming the haze could be leading to several hundreds of thousands of premature deaths as a result of higher levels of respiratory diseases."
- 3 "The haze has cut down sunlight over India by 10 per cent (so far) — a huge amount ! As a repercussion, the North-West of India is drying up," Prof. V. Ramanathan said when asked specifically about the impact of the haze over India. He said, "We are still in an early stage of understanding of the impact of the haze."
- 4 Prof. V. Ramanathan was asked whether the current droughts in most parts of India after over a decade of good monsoons was owing to the haze. He said, "It was too early to reach a conclusion. If the droughts persist for about four to five years, then we would start suspecting that it may be because of the haze." India, China and Indonesia are the worst affected owing to their population density, economic growth and depleting forest cover.
