French and English came to India, attracted by its wealth and wanted to establish themselves as dominant traders.

This led to creation of friction and consequently intense rivalries:

'There were 3 carnatic wars fought

(1) 1st War (1746-1748) due to outbreak of Austrian war of succession

(2) 2nd war (1749-1753) due to rival claimants backing in Carnatic and Hyderabad. Initial French victories however later truce

DEMOCRATIC PRACTICES ADOPTED

- ① Using newspaper as medium to disseminate ideas (eg The Hindu - G.S. Aijer)
- ② Peaceful protests

British rule came and brought along with the concept of rule of law which was different from traditional caste and religion based judicial system of the country.

FEATURES OF THIS SYSTEM

Lord Cornwallis was the pioneer of this system and created a setup where:

- There shall be equality of all before law
- There shall be codification of laws
- Separation of executive powers from judicial powers

• Europeans were also brought before this system.

He also helped establish Circuit Courts as well as shifting of diwani adalat to Calcutta.

Later on Lord Macaulay was head of committee for codifying laws to further strengthen rule based law.

LIMITATIONS OF THIS SYSTEM

- ① Law was unequally applied to Indians vis-a-vis British
- ② The judicial process was expensive
- ③ It was biased towards rich landlords, Maharajas etc
- ④ The judges were exclusively European

- ⑤ Courts were at few places
hampering accessibility
- ⑥ The language was complex
and beyond understanding of simple
[Indian]

Thus it can be observed that
the system though created a
fiction of rule of law, was
actually created to best serve the
needs of imperial masters.

The inadequacy of judicial
system was exposed in numerous
revolts such as Satthal, Indigo
etc.

- The surrender of nearly 90,000 Pakistani soldiers to India
- Cold war compartmentalizing the nations into groups: Pakistan (US tilt) and India (USSR tilt)

PROVISIONS

- Recognizing the borders as actual Line of Control (LOC) and to respect

it as the boundary of 2 countries

- To restrict the Kashmir issue to a bilateral issue
- Repatriation of the surrendered Pakistani soldiers
- To ease hostilities in future

A LOST OPPORTUNITY ?

Yes

- India had upper hand when signing the treaty
- Could have permanently resolved Kashmir issue by negotiating for POK
- The Prisoners of war provided leverage for India to put further pressure on Pakistan

No

- Permanent solution involving ceding

PoK was not viable as Pakistan would not compromise on territory

- International ~~area~~ pressure was building up with US and China taking Pakistan side
- By restricting the Kashmir issue to bilateral level, India helped prevent future internationalization of issue
- The recognition of LoC provided stability to border recognition

CONCLUSION

Thus Shimla agreement when signed was a fair bargain considering the context. ~~It~~ ~~India~~ helped generate goodwill for India by returning the PoWs. ~~Also there were~~
~~some terms~~

 - Scheme for ASHAs to deliver contracept. at home

Thus population control is a vital agenda for sustainable future and the PM's clarion call on independence day sets the ball rolling.

India has acute regional disparities as evident from the fact that GDP/capita of rich states is more than 4 times of poor states.

REASONS BEHIND

Geographical

- Hilly states
- have inadequate access to resource

- They are frequently facing landslides, floods etc

- They are located in seismically active regions hampering large scale developmental works

Landlocked states

- Have difficulty in export vis-a-vis coastal areas

Fig: Highlighting certain states and reasons for deprivation

- States such as Jharkhand, Chhattisgarh suffer from RESOURCE CURSE (benefits of raw material extractions not percolating)
- States like Bihar suffer from Floods GOVERNANCE ISSUES

- States such as UP, Bihar, Nagaland affected states suffer from governance deficit
- Populist schemes are resented to
- Colonial legacy in terms of large number of poor people also issue
- The states policies of promoting only agriculture led to shifting of services, manufacturing to coastal states

STRATEGIES NEEDED

- Equitable distribution of funds (Finance commission has to play a major role)

- Long term policies focussed on manufacturing sector (labour intensive)
- Human Capital development by investing on health, education (Kerala Model)
- Improving infrastructure (roads, electricity)
- Regional specific strategies utilizing strengths e.g

North East: Tourism, Horticulture

Central India: Capitalize on resource

UP/Bihar: Agro based industries

STEPS TAKEN

- Aspirational districts program
- North East Special Infra development scheme (NESIDS)
- 90:10 fund sharing with hilly states
- Sustainable Action for transforming human capital (SATH)

Thus bridging regional disparities, is an integral part of sarvodaya philosophy of Gandhi and an obligation on our govt to uphold constitutional values,

Highlighting different factors affecting Indian monsoon, explain why it is difficult to predict it.
(Answer in 250 words) 15

India being a tropical as well as temperate region country has unique climate. Monsoon further adds to this uniqueness by bringing seasonal rainfall.

FACTORS

AFFECTING MONSOON

- ① Position of Sun: When it shifts to north of equator, initiates process
-

- ② Position of ITCZ: Determines the region of heavy precipitation

③ withdrawal of Subtropical westerly jet stream to the north of himalayas

④ Heating of tibetan plateau and creation of low pressure. Melting of ice also prerequisite

⑤ Development of tropical easterly jet streams.

⑥ Other factors such as

(1) El Nino: weakens monsoon

(2) La Nino: strengthens monsoon

(3) Madden Julian Oscillation

(4) Setting up of Somali Jet stream

WHY DIFFICULT TO PREDICT

- Multiple factors involved
- Correlation between different factors not clearly established.

- Lack of long term historical data
- Climate change inducing erraticness
- Linked with global climatic phenomena thus hard to study in isolation.

To improve the predictability of monsoon, IMD now uses dynamic weather modelling using ENSEMBLE PREDICTION SYSTEM. Further usage of AI and big data can help in our understanding of monsoon.

Cyclones are climatic phenomena which involve low pressure system with winds circling around at high speeds

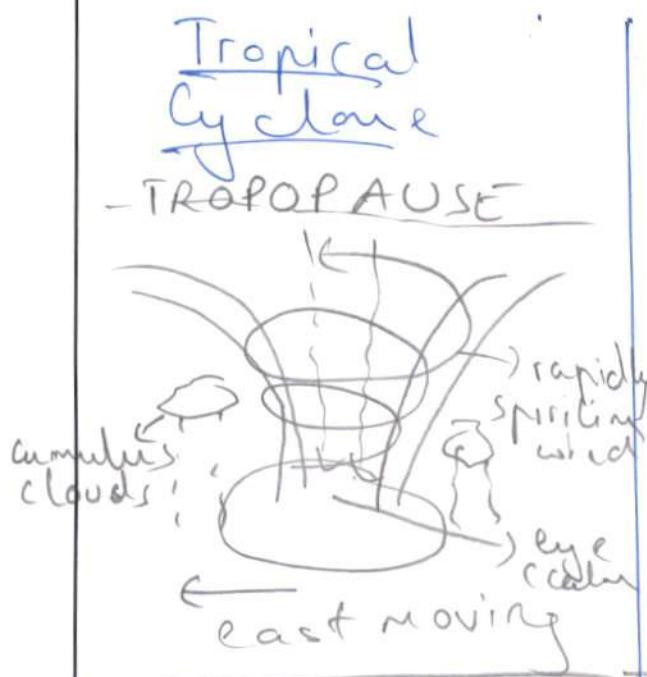

Fig: Tropical cyclone

Origin: Over Oceans, need warm water ($\sim 25^\circ$), lack of upper air circulation

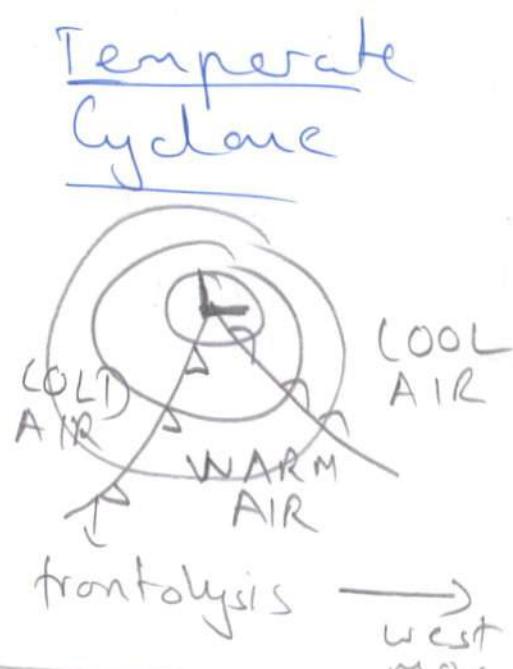

Fig: Temperate cyclone

Origin: Over land as well as sea
Formed dynamically with collision of

in existing depression area,
50-100m depth of warm water.

Occur at lower latitudes (10° - 30° N)
Require Coriolis force

Cold and warm air mass. Takes place at higher latitudes (Extra tropical cyclone)

MOVEMENT

- Move west to east
- Move at much faster pace (upto 180km/hr)
- Spread over smaller area

MOVEMENT

- Move east to west
- Move relatively slower (upto 100km)
- Spread over larger area

MATURE

- They mature as long as they can get warm water supply

MATURE

- Mature as long as there exist contrast between two fronts

DECAY

They decay as soon as they make landfall and move over to land

DECAY

They decay when contrast between fronts ceases to exist.

It is not dependent on land/sea
