6

LEDGER

You have learnt that business transactions are recorded in various special purpose books and journal proper. The accounting process does not stop here. The transactions are recorded in number of books in chronological order. Such recording of business transactions serves little purpose of accounting. Items of same title in different books of accounts need to be brought at one place under one head called an account. There are numerous account titles of items/persons or accounts. All the accounts, if brought in one account book, will be more informative and useful. The account book so maintained is called Ledger.

In this lesson, you will learn about Ledger and posting of items entered in various books of accounts to ledger.

After studying this lesson, you will be able to:

- state the meaning, features and importance of ledger;
- enumerate the various types of ledger;
- state the meaning of posting and explain the steps of posting journal into ledger;
- calculate the balance of the account in the ledger.

6.1 LEDGER: MEANING, IMPORTANCE AND TYPES

You have already learnt about accounts. Each transaction affects two accounts. In each account transactions related to that account are recorded. For example, sale of goods taking place number of times in a year will be put under one Account i.e. Sales Account.

All the accounts identified on the basis of transactions recorded in different journals/books such as Cash Book, Purchase Book, Sales Book etc. will be opened and maintained in a separate book called Ledger. So a ledger is a book of account; in which all types of accounts relating to assets, liabilities, capital, expenses and revenues are maintained. It is a complete set of accounts of a business enterprise.

Ledger is bound book with pages consecutively numbered. It may also be a bundle of sheets.

Thus, from the various journals/Books of a business enterprise, all transactions recorded throughout the accounting year are placed in relevant accounts in the ledger through the process of posting of transactions in the ledger. Thus, posting is the process of transfer of entries from Journal/Special Journal Books to ledger.

Features of ledger

- Ledger is an account book that contains various accounts to which various business transactions of a business enterprise are posted.
- It is a book of final entry because the transactions that are first entered in the journal or special purpose Books are finally posted in the ledger. It is also called the Principal Book of Accounts.
- In the ledger all types of accounts relating to assets, liabilities, capital, revenue and expenses are maintained.
- It is a permanent record of business transactions classified into relevant accounts.
- It is the 'reference book of accounting system and is used to classify and summarise transactions to facilitate the preparation of financial statements.

Format of a ledger sheet

The format of a ledger sheet is as follows:

Title of an Account

Dr. Cr.

Date Particulars JF Amount Rs. Date Particular JF Amount Rs.

You must have noticed that the format of a ledger sheet is similar to that of the format of an Account about which you have already learnt. A full

MODULE - 1

Basic Accounting

Basic Accounting

sheet page may be allotted to one account or two or more accounts may be opened on one sheet. It depends upon the number of items related to that account to be posted.

Importance of Ledger

Ledger is an important book of Account. It contains all the accounts in which all the business transactions of a business enterprise are classified. At the end of the accounting period, each account will contain the entire information of all the transactions relating to it. Following are the advantages of ledger.

• Knowledge of Business results

Ledger provides detailed information about revenues and expenses at one place. While finding out business results the revenue and expenses are matched with each other.

• Knowledge of book value of assets

Ledger records every asset separately. Hence, you can get the information about the Book value of any asset whenever you need.

• Useful for management

The information given in different ledger accounts will help the management in preparing budgets. It also helps the management in keeping the check on the performance of business it is managing.

Knowledge of Financial Position

Ledger provides information about assets and liabilities of the business. From this we can judge the financial position and health of the business.

Instant Information

The business always need to know what it owes to others and what the others owe to it. The ledger accounts provide this information at a glance through the account receivables and payables.

Types of Ledger

In large scale business organisations, the number of accounts may run into hundreds. It is not always possible for a businessman to accommodate all these accounts in one ledger. They, therefore, maintain more than one ledger.

These ledgers may be as follows:

Types of Ledger

- **1. Assets Ledger:** It contains accounts relating to assets only e.g. Machinery account, Building account, Furniture account, etc.
- **2. Liabilities Ledger :** It contains the accounts of various liabilities e.g. Capital (Owner or partner), Loan' account, Bank overdraft, etc.
- **3. Revenue Ledger :** It contains the revenue accounts e.g.. Sales account, Commission earned account, Rent received account, interest received account, etc.
- **4. Expenses Ledger :** It contains the various accounts of expenses incurred, e.g. Wages account, Rent paid account, Electricity charges account, etc.
- **5. Debtors Ledger :** It contains the accounts of the individual trade debtors of the business. Individuals, firms and institutions to whom goods and services are sold on credit by business become the 'trade debtors' of the business.
- **6.** Creditors Ledger: It contains the accounts of the individual trade Creditors of the business. Individuals, firms and institutions from whom a business purchases goods and services on credit are called 'trade creditors' of the business.
- **7. General Ledger :** It contains all those accounts which are not covered under any of the above types of ledger. For example Landlord A/c, Prepaid insurance A/c etc.

INTEXT QUESTIONS 6.1

- I. Fill in the blanks with a suitable word or words:
 - (i) Ledger contains various in it.
 - (ii) The process of transfer of entries from Journal and special purpose books to ledger is called
 - (iii) Ledger is also called
 - (iv) Ledger is a book of accounting system.
- II. Match the column A with column B:

A

B

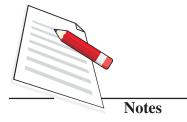

- (i) Book containing accounts
- (a) Ledger
- (ii) Pages number of the ledger
- (b) Liabilities ledger
- (iii) Machinery account, Building account, furniture Accounts, etc.
- (c) Revenue ledger

MODULE - 1

- (iv) Loan's account, Bank overdraft account, etc.
- (v) Rent paid, wages paid, electricity charges
- (e) Folio

(d) Expenses ledger

(vi) Sales account, commission account, (f) Assets ledger interest received account etc.

6.2 POSTING OF JOURNAL PROPER INTO LEDGER

You know that the purpose of opening an account in the ledger is to bring all related items of this account which might have been recorded in different books of accounts on different dates at one place. The process involved in this exercise is called posting in the ledger. This procedure is adopted for each account.

To take the items from the journal to the relevant account in the ledger is called posting of journal. Following procedure is followed for posting of journal to ledger:

- 1. Identify both the accounts 'debit' and credit of the journal entry. Open the two accounts in the ledger.
- 2. Post the item in the first account by writing date in the date column, name of the account to be credited in the particulars column and the amount in the amount column of the 'debit' side of the account.
- 3. Write the page number of the journal from which the item is taken to the ledger in Folio column and write the page number of the ledger from which account is written in L.F. column of the journal.
- 4. Now take the second Account and give the similar treatment. Write the date in the 'date' column, name of the account in the 'amount' column of the account on its credit side in the ledger.
- 5. Write page number of journal in the 'folio' column of the ledger and page number of the ledger in the 'LF' of column of the journal.

Posting Scheme

Posting from the journal to the ledger-Debit account

MODULE - 1

Basic Accounting

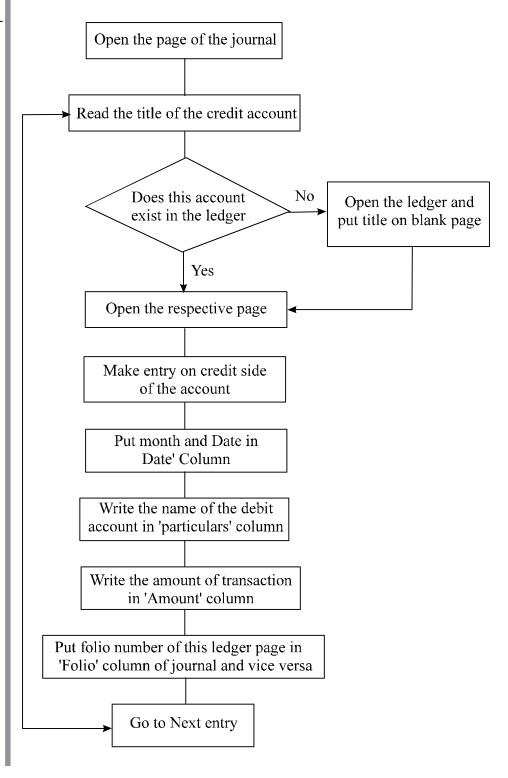

Basic Accounting

Ledger

Posting Scheme

Posting from the Journal to the ledger-Credit Account

110

INTEXT QUESTIONS 6.2

1. State the meaning of ledger posting

- 2. Following are the steps of posting of journal to ledger but are not in proper order. Write them in correct order:
 - (a) Write the page number of journal in the JF column of ledger and that of ledger on which account has been taken from journal.
 - (b) Identify the two affected accounts in the journal and open these accounts in the ledger
 - (c) Take date and amount of the debit account, and name of the credit account from journal to ledger in their respective columns.
 - (d) While posting the credit account from journal in the ledger write page number of the journal from which item is taken to ledger in JF column of ledger and page number of ledger on which item is taken on the LF column of the journal.

6.3 BALANCING OF AN ACCOUNT

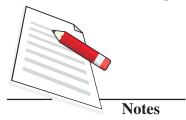

Balancing of an account is the difference between the total of debits and total of credits of an account. If debit side total is more than the credit side, the account shows a debit balance. Similarly, the balance will be credit if the credit side total of an account is more than the debit side total. This process of ascertaining and writing the balance of each account in the ledger is called balancing of an account. An account has two sides: debit and credit. Items by which this account is debited are entered on its debit side with their amounts and items by which this account is credited are entered on its credit side with their amounts so all items related to an account are shown at one place in the ledger. But then you would like to know the net effect of this account i.e. the balance between its debit amount and credit amount. The following steps are to be followed in Balancing the Ledger Account:

- Total up the two sides of an Account on a rough sheet.
- Determine the difference between the two sides. If the credit side is more than the debit side, the balance calculated is a credit balance.

MODULE - 1

Basic Accounting

• Put the difference on the 'Shorter side' of the account such that the totals of the two sides of the account are equal.

- If the difference amount is written on debit side (i.e., if credit, side is bigger) then write as "Balance c/d" (c/d stands for carried down). If difference is written on the credit side (i.e., if debit side is bigger) then write it as "Balance c/d.
- Finally at the end of the year all the ledger accounts are closed by taking out the balance of each account.

The Balance then should be brought down or carried forward to the next period. If the difference was put on credit side as "Balance c/d" it should now be written on the debit side of the account as "Balance b/d" (b/d stands for brought down) and vice-a-versa. Thus debit balance will automatically be brought down on the debit side and a credit balance on the credit side.

Balancing of different types of Accounts

Assets: All asset accounts are balanced. These accounts always

have a debit balance.

Liabilities: All Liability accounts are balanced. All these accounts

have a credit balance.

Capital: This account is always balanced and usually has a credit

balance.

Revenue

Expense and: These Accounts are not balanced but are simply totalled

> up. The debit total of Expense/Loss will show the expense/Loss. In the same manner, credit total of Revenue/ Income will show increase in income. At the time of preparing the Trial Balance, the totals of these are taken

to the Trial Balance.

The Balance of Assets, Liabilities and Capital Accounts will be shown in Balance Sheet whereas total of Expense/Loss and Revenue/Income will be taken to the Trading and Profit and Loss Account. These Accounts are, thus, closed.

If two sides of an Account (usually Assets, Liabilities and Capital) are equal there will be no balance. The Account is then simply closed by totalling up of the two sides of the account.

WHAT YOU HAVE LEARNT

- Ledger is a register with pages ruled in account form to enable the preparation of accounts.
- Ledger is a permanent record of business transactions which are classified according to various accounts to which they pertain.
- Ledger may be Assets Ledger, Liabilities Ledger, Revenue ledger, Expense ledger, Debtors' ledger, Creditors' ledger and General ledger.
- The debit item of journal is posted to the credit side of the relevant account in the ledger.
- The credit item of journal is posted to the Debit Side of the relevant account in the ledger.
- Name of the account in the journal is entered in 'Particulars' column of the relevant account in the ledger.
- The page No. of journal from where entries are being posted is entered in folio column of the various relevant accounts.
- In the ledger Book, the balances of Assets, Liabilities and Capital are carried forward to the next period. Revenue and Expense accounts are closed by transferring their totals to Trading and Profit and Loss A/c.
- The balance of an account is written on the side having lower total, so that its total becomes equal to the total of the other side.

TERMINAL QUESTIONS

- 1. What is ledger? Why is ledger prepared?
- 2. Why is ledger known as the primary book or the principal -book of accounts? Can profit of the business and its financial position be known without maintaining ledger?
- 3. Enumerate the various types of ledgers which may be maintained by a business.
- 4. What is the rule for posting the debit account from the journal into the ledger account?

- 5. What is rule for positing the credit item of the journal into the ledger accounts?
- 6. What are the advantages of maintaining a ledger?
- 7. What is meant by balancing of an account? Explain the various steps taken while balanceing accounts.
- 8. How do we balance the following types of accounts?
 - (a) Assets
- (b) expense
- (c) capital
- (d) Revenue
- 9. Following are the transactions of Dhani Ram and Sons for the month of July 2006. Make journal entries, post them into ledger and balance the account.

2006

July 1		Commenced business with cash	60,000
,,	2	Paid into bank	40,000
,,	5	Purchased furniture for cash	5000
,,	7	Purchased Goods and paid for them by cheque	20000
,,	10	Sold Goods to Lata Gupta for cash	12000
,,	12	Sold Goods to Mahavir on credit	24000
,,	18	Purchased Goods from Harish	30000
,,	19	Withdrew cash for domestic use	2500
,,	20	Received a cheque from Mahavir on account	18900
		Allowed him discount	100
,,	27	Paid to Harish cash on account	16800
		Discount allowed by him	200
,,	31	Paid salary by cheque	1800
		Paid cash for telephone bill	600
