केस अध्ययन — भरमौर क्षेत्र में समन्वित जनजातीय विकास कार्यक्रम

भरमौर जनजातीय क्षेत्र में हिमाचल प्रदेश के चंबा ज़िले की दो तहसीलें, भरमौर और होली शामिल हैं । यह 21 नवंबर, 1975 से अधिसूचित जनजातीय क्षेत्र है । इस क्षेत्र में *'गद्दी'* जनजातीय समुदाय का आवास है । इस समुदाय की हिमालय क्षेत्र में अपनी एक अलग पहचान है क्योंकि गद्दी लोग ऋतु-प्रवास करते हैं तथा *गद्दीयाली* भाषा में बात करते हैं ।

भरमौर जनजातीय क्षेत्र में जलवायु कठोर है, आधारभूत संसाधन कम हैं और पर्यावरण भंगुर (fragile) है । इन कारकों ने इस क्षेत्र की अर्थव्यवस्था और समाज को प्रभावित किया है । 2011 की जनगणना के अनुसार, भरमौर उपमंडल की जनसंख्या 39,113 थी अर्थात् 21 व्यक्ति प्रति वर्ग किलोमीटर । यह हिमाचल प्रदेश के आर्थिक और सामाजिक रूप से सबसे पिछड़े इलाकों में से एक है । ऐतिहासिक तौर पर, गद्दी जनजाति ने भौगोलिक और आर्थिक अलगाव का अनुभव किया है और सामाजिक-आर्थिक विकास से वंचित रही है । इनका आर्थिक आधार मुख्य रूप से कृषि और इससे संबद्ध क्रियाएँ जैसे भेड़ और बकरी पालन हैं ।

भरमौर जनजातीय क्षेत्र में विकास की प्रक्रिया 1970 के दशक में शुरू हुई जब गद्दी लोगों को अनुसूचित जनजातियों में शामिल किया गया । 1974 में पाँचवीं पंचवर्षीय योजना के अंतर्गत जनजातीय उप-योजना प्रारंभ हुई और भरमौर को हिमाचल प्रदेश में पाँच में से एक समन्वित जनजातीय विकास परियोजना (आई.टी.डी.पी.) का दर्जा मिला । इस क्षेत्र विकास योजना का उद्देश्य गद्दियों के जीवन स्तर में सुधार करना था ।

15. भरमौर जनजातीय क्षेत्र निम्नलिखित राज्यों में से किसमें आता है ?

- (c) उत्तर प्रदेश (d) जम्मू और कश्मीर
- 16. भरमौर प्रदेश में निम्नलिखित में से किस जनजातीय समुदाय की प्रधानता है ?
 - (a) बक्करवाल (b) भील
 - (c) गोंड (d) गद्दी

17. समन्वित जनजातीय विकास कार्यक्रम (आई.टी.डी.पी.) का प्रमुख उद्देश्य क्या है ?

- (a) सिंचाई को सुधारना
- (b) भेड़ पालन में सुधार करना
- (c) प्रदेश की मृदाओं में सुधार करना
- (d) गद्दियों के जीवन स्तर में सुधार करना

 खनन की विधियाँ

उपस्थिति की अवस्था एवं अयस्क की प्रकृति के आधार पर खनन के दो प्रकार हैं : धरातलीय एवं भूमिगत खनन । धरातलीय खनन को विवृत खनन भी कहा जाता है । यह खनिजों के खनन का सबसे सस्ता तरीका है, क्योंकि इस विधि में सुरक्षात्मक पूर्वोपायों एवं उपकरणों पर अतिरिक्त खर्च अपेक्षाकृत निम्न कम होता है एवं उत्पादन शीघ्र व अधिक होता है ।

जब अयस्क धरातल के नीचे गहराई में होता है तब भूमिगत अथवा कूपकी खनन विधि का प्रयोग किया जाता है । इस विधि में लंबवत् कूपक गहराई तक स्थित हैं, जहाँ से भूमिगत गैलरियाँ खनिजों तक पहुँचने के लिए फैली हैं । इन मार्गों से होकर खनिजों का निष्कर्षण एवं परिवहन धरातल तक किया जाता है । खदान में कार्य करने वाले श्रमिकों तथा निकाले जाने वाले खनिजों के सुरक्षित और प्रभावी आवागमन हेतु इसमें विशेष प्रकार की लिफ्ट बेधक (बरमा), माल ढोने की गाड़ियाँ तथा वायु संचार प्रणाली की आवश्यकता होती है । खनन का यह तरीका जोखिम भरा है क्योंकि जहरीली गैसें, आग एवं बाढ़ के कारण कई बार दुर्घटनाएँ होने का भय रहता है । क्या आपने कभी भारत की कोयला खदानों में आग लगने एवं बाढ़ आने के विषय में पढ़ा है ?

विकसित अर्थव्यवस्था वाले देश उत्पादन की खनन, प्रसंस्करण एवं शोधन कार्य से पीछे हट रहे हैं क्योंकि इसमें श्रमिक लागत अधिक आने लगी है । जबकि विकासशील देश अपने विशाल श्रमिक शक्ति के बल पर अपने देशवासियों के ऊँचे रहन-सहन को बनाए रखने के लिए खनन कार्य को महत्त्व दे रहे हैं । अफ्रीका के कई देश, दक्षिण अमेरिका के कुछ देश एवं एशिया में आय के साधनों का पचास प्रतिशत तक खनन कार्य से प्राप्त होता है ।

- (19.1) धरातलीय एवं भूमिगत खनन में एक मुख्य अन्तर स्पष्ट कीजिए ।
- (19.2) विवृत खनन, खनन की सबसे सरल विधि क्यों है ?
- (19.3) कूपकी खनन, खनन की जोखिम भरी विधि क्यों है ?

- *Note*: The following questions are for Visually Impaired Candidates only in lieu of Q. No. 18.
 - (18.1) These is a decline in India's exports of traditional items such as coffee, cashew etc. Give an appropriate reason.
 - (18.2) Why is there a steep rise in India's import of petroleum products?
 - (18.3) Which sector has the highest share in India's total value of exports ?

19. Read the given passage carefully and answer the questions that follow : $3 \times 1=3$

Methods of Mining

Depending on the mode of occurrence and the nature of the ore, mining is of two types : surface and underground mining. The surface mining also known as *open-cast* mining is the easiest and the cheapest way of mining minerals that occur close to the surface. Overhead costs such as safety precautions and equipment are relatively low in this method. The output is both large and rapid.

When the ore lies deep below the surface, underground mining method (shaft method) has to be used. In this method, vertical shafts have to be sunk, from where underground galleries radiate to reach the minerals. Minerals are extracted and transported to the surface through these passages. It requires specially designed lifts, drills, haulage vehicles, ventilation system for safety and efficient movement of people and material. This method is risky. Poisonous gases, fires, floods and caving in lead to fatal accidents. Have you ever read about mine fires and flooding of coal mines in India ?

The developed economies are retreating from mining, processing and refining stages of production due to high labour costs, while the developing countries with large labour force and striving for higher standard of living are becoming more important. Several countries of Africa and few of South America and Asia have over fifty percent of the earnings from minerals alone.

- (19.1) Explain the main difference between surface and underground mining.
- (19.2) Why is open-cast mining the easiest way of mining?
- (19.3) Why is shaft mining more risky?

	assessment of the candidates. A small mistake in evaluation may lead to serious			
	problems which may affect the future of the candidates, education system and teaching			
	profession. To avoid mistakes, it is requested that before starting evaluation, you must			
	read and understand the spot evaluation guidelines carefully.			
2				
	"Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, Evaluation done and several other aspects. 3				
	Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one's own interpretation or any other consideration. However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and due marks be awarded to them. In class-X, while evaluating two competency-based questions, please try to understand given answer and even if reply is not from marking scheme but correct competency is enumerated by the candidate, due marks should be awarded.			
4	The Marking ask and any supported value points for the answer			
	The Marking scheme carries only suggested value points for the answers These are in the nature of Guidelines only and do not constitute the complete answer.

	evaluator on the first day, to ensure that evaluation has been carried out as per the			
	instructions given in the Marking Scheme. If there is any variation, the same should be			
	zero after delibration and discussion. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of

12	Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours every day and evaluate 20 answer books per day in main subjects and 25 answer books per day in other subjects (Details are given in Spot Guidelines). This is in view of the reduced syllabus and number of questions in question paper.
13	 Ensure that you do not make the following common types of errors committed by the Examiner in the past:- Leaving answer or part thereof unassessed in an answer book. Giving more marks for an answer than assigned to it. Wrong totaling of marks awarded on an answer. Wrong transfer of marks from the inside pages of the answer book to the title page. Wrong question wise totaling on the title page. Wrong totaling of marks of the two columns on the title page. Wrong grand total. Marks in words and figures not tallying/not same. Wrong transfer of marks from the answer book to online award list. Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.) Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
14	While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0)Marks.
15	Any un assessed portion, non-carrying over of marks to the title page, or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
