(Reading Comprehension)

6. Read the following passage and answer the questions given below :

Radium is called a 'magic metal' because it has certain wonderful properties. It continuously gives off particles and invisible rays of energy (similar X-rays) because of the breaking up of its atoms. This is called radio-activity. While the atoms break up continuously, the metal does not noticeably lose weight. It has in it, as it were, an inexhaustible store of energy.

Radium is one of the rarest of metals. It is also one of the most useful metals to man, because its property of radio-activity helps doctors to cure some diseases which they once thought incurable. For instance, those suffering from cancer and some kinds of skin diseases have now hope of cure by treatment with the help of radium. It is no wonder, therefore, that hospitals pay huge sum of money for a few milligrams of it.

Answer the questions: (any four)

- (i) Which metal is called a magic metal?
(ii) What keeps happening to radium?
(iii) Which property of radium is helpful to doctors?
(iv) Why is radium called a 'magic metal'?

- (v) What diseases can be treated by radium?
- (vi) What was inexhaustible store of energy?
