

Chapter 5

Presenting Ideas

During their recent school trip, Samayra and Shirom got the chance to explore the historical places of Delhi, the capital of India. Few of their classmates were not able to join them.

Samayra: I wish all our friends were here with us. They not only missed the fun but also the knowledge about our rich heritage.

Shirom: It does not matter. Let us do something so that they don't miss out on the learning.

Samayra: That would be nice. But how can we do it?

Shirom: Let us compile our experiences, highlighting the captured moments of the trip in a report.

Samayra: But this report will not give our friends the real picture of our experience and our interaction with the guide, etc.

Shirom: True. Then let's make a presentation.

Samayra: Shirom, what do you mean by a presentation?

Shirom: A presentation is used to present information using text, images, audio, video and animations. Do you know we can even add our narration to the slides ?

Samayra: Oh is it? This would be wonderful.

Shirom: Let us start. The first step is to open it by clicking on the **Impress** icon present on the desktop.

Samayra: Let us start.

[illegible]

Fig. 5.2: Choosing the slide layout

Samayra: Shirom, can we add our names also?

Shirom: Sure, let us do that.

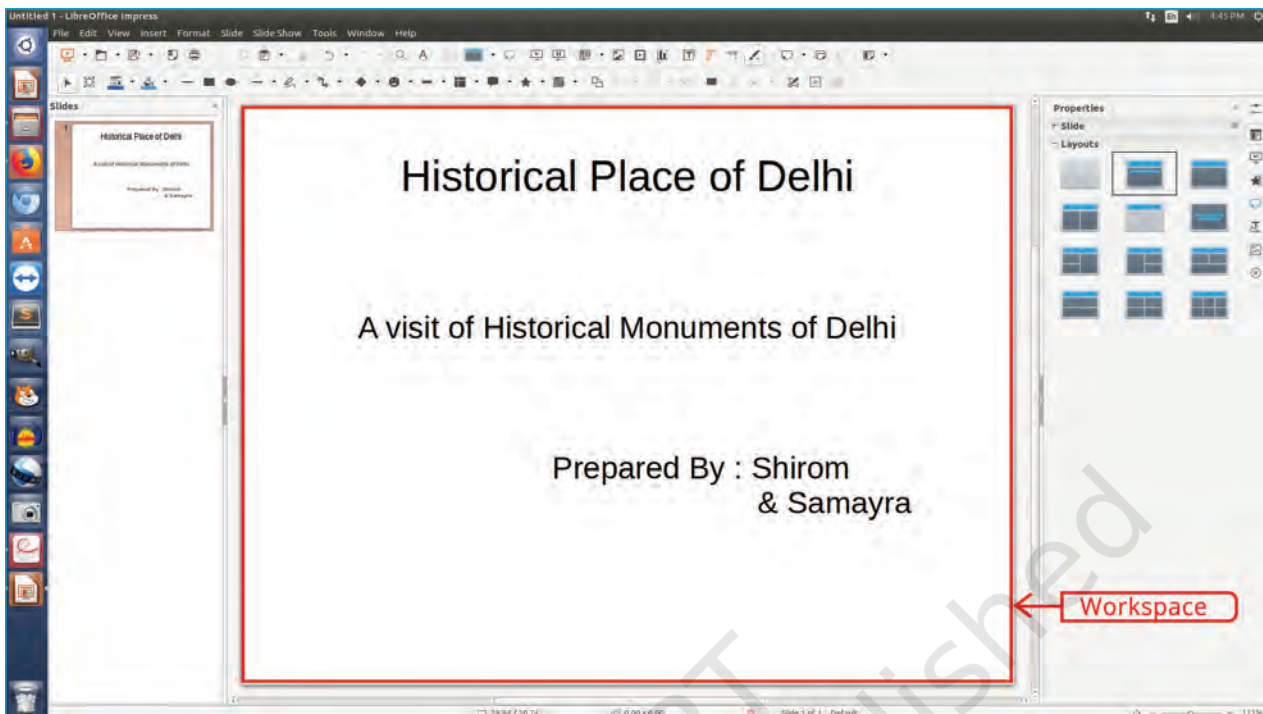

Fig. 5.3: The title slide

Layout helps to decide the placement of text or pictures on a slide.

Samayra: Can we add more content, such as text (as shown in Fig. 5.4), photographs or images, audio and videos, which we have collected during the visit.

Shirom: No. We will need more slides for that. Let us add more slides to our presentation.

Samaira: Great! Seems interesting. I hope our presentation will help them to get the feel of the trip.

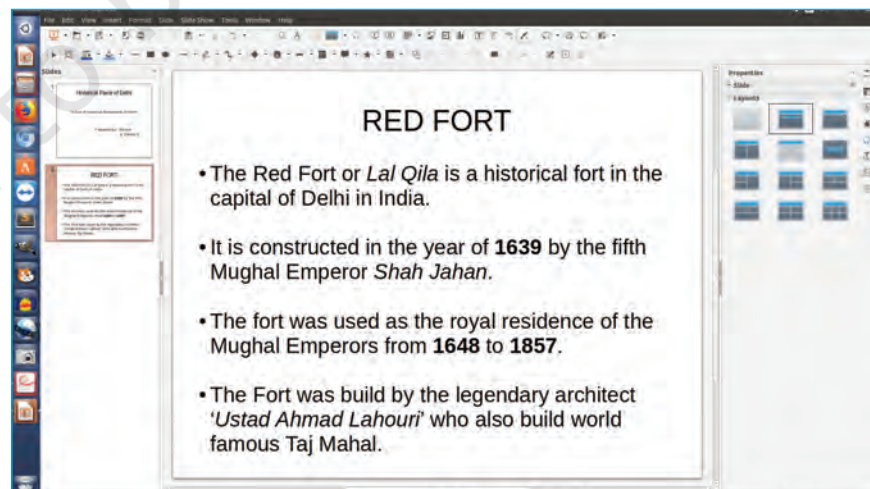

Fig. 5.4: Adding text content

Samayra: Shirom, can we add a picture of the Red Fort?

Shirom: Yes, we can do that by using the **Insert Menu** (Refer Fig. 5.5).

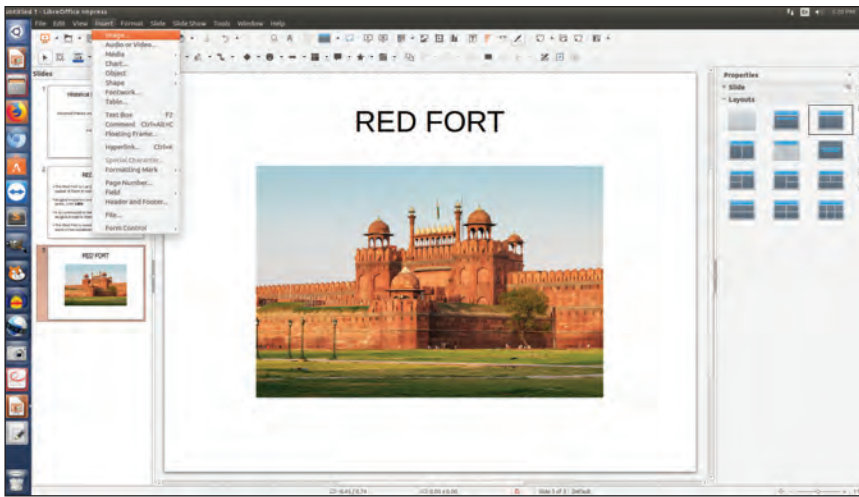

Fig. 5.5: Inserting an image

Samayra: Once, we have inserted the image, can we also add some special effects to our images and text to make our presentation more attractive and grab attention of the audience.

Shirom: Yes, indeed! Let us select the text or object to be animated and add some custom animation to it, as shown in Fig. 5.6.

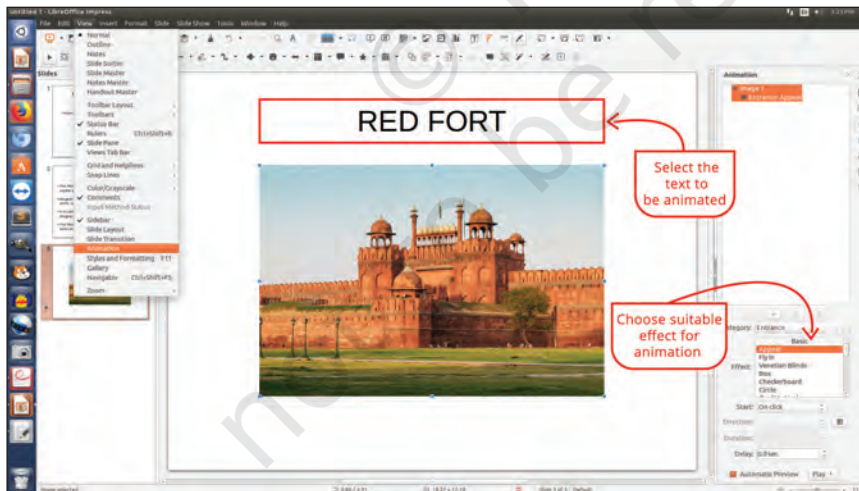

Fig 5.6 : Animating the image

For example, you may choose to apply various effects that may change the Font Size and apply special effects to the text, such as Blink and save that effect on the text.

Similarly, you can apply different effects in your slide to make your presentation interesting and attractive.

Samayra: Oh! Great but tell me how to check what we have done so far?

Shirom: For this we will preview our presentation using Slide show option, as shown in Fig. 5.7. To do, press F5 key or using the Slide Show menu. Let me now tell you one more interesting feature: **Slide Transition** which can be added from the view menu.

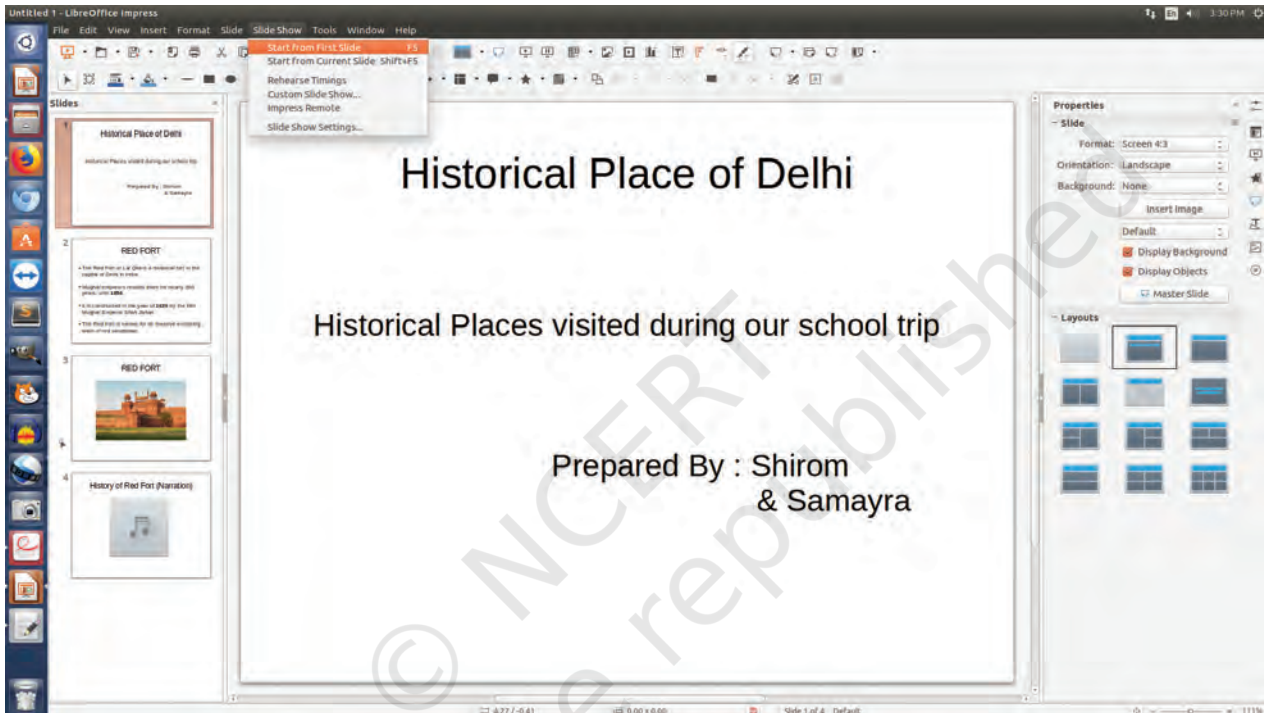

Fig. 5.7: Slide show

Samayra: I have taken a recording clip of the guide narrating the story. Also if we could insert the audio clip too! Moreover we have some video clips that also could be inserted in our presentation. It will make our presentation lively and more informative.

Shirom: Yes, let us do it using the **Audio or Video** option of the **Insert Menu**, as shown in Fig. 5.8.

Samayra: Tell me the steps how I should do it.

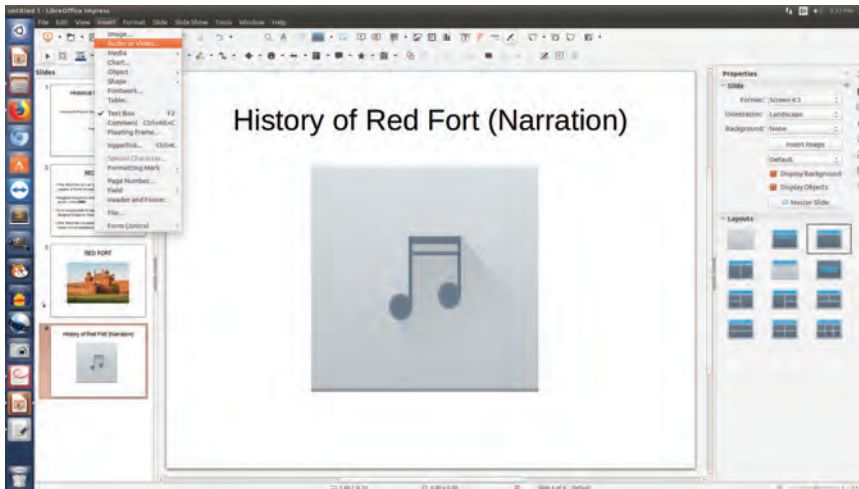

Fig. 5.8: Adding sound

Custom animation helps us to add emphasis on an object area on a screen.

Avoid adding too many animation effects on a slide as it reduces the focus on the main content.

Shirom: Now, if you wish, you can add more information in your presentation to enhance it with various colourful slides, animations, transitions effects and media and make it ready for the show. You can share your experiences of the trip with your classmates in the class with the help of projector and cherish the moments by viewing the slideshow. Once the show has started and in between if you would like to go to the next slide or previous one at a time, then Right-clicking anywhere on the screen brings up the floating menu that allows navigation of the slides as shown in Fig. 5.9.

Fig. 5.9: Navigating in slide show

Samayra: Shirom, can we view the sequential arrangement of all the slides on a single screen?

The screenshot displays the Microsoft PowerPoint application window. On the left, the 'Slide Sorter' view is selected in the 'View' tab of the ribbon. The main workspace shows six slide thumbnails arranged in a 2x3 grid. Slide 1 is titled 'Historical Place of Delhi' and includes a list of places visited. Slide 2 is titled 'RED FORT' and contains bullet points about its history. Slide 3 is also titled 'RED FORT' and features an image of the fort. Slide 4 is titled 'History of Red Fort (Narration)' and shows a musical note icon. Slide 5 is titled 'Qutub Minar' and includes an image of the monument. Slide 6 is titled 'Thank You'.

Samayra: Now we are ready to share our presentation with all our classmates.

The screenshot displays the LibreOffice Impress application window. The main slide area shows a presentation slide with the title "Qutub Minar" at the top and a large photograph of the Qutub Minar tower in the center. The tower is a tall, cylindrical stone structure with a spiral pattern, surrounded by trees and a clear blue sky. The application's interface includes a menu bar at the top with options like File, Edit, View, Insert, Format, Tools, Window, and Help. On the left, there is a sidebar with various icons for navigating through the presentation. On the right, a "Properties" panel is visible, showing settings for the selected slide, such as "Slide", "Format", "Orientation", "Background", and "Transitions". The status bar at the bottom indicates the current slide is "Slide 1 of 4".

2021-22

Samayra: It was so interesting to learn how to make a presentation and share it with our friends.

No effects or animations can be seen in PDF.

Exercises

1. Prepare a presentation on the following topics:

- (i) Your personal experience of meeting people in orphanage, old age home, etc.
- (ii) Experience of summer vacation
- (iii) School's Annual day celebrations
- (iv) Biography of a scientist or a historian

2. Test yourself

- (a) Identify whether the following statements are True or False
 - (i) We can make changes in the PDF version of any file. (T/F)
 - (ii) We can insert video and audio clips in a presentation. (T/F)
 - (iii) The number of slides that can be added in a presentation has a limit. (T/F)
 - (iv) Impress is a free and open source presentation tool. (T/F)
 - (v) The background and design of the presentation cannot be changed once saved. (T/F)
