Read the following hypothetical situation and answer question no. 14 and 15 on its basis:

Rudra, Dev and Shiv were partners in a firm sharing profits in the ratio of 5:3:2. Their fixed capitals were $\stackrel{?}{\underset{?}{|}}$ 6,00,000, $\stackrel{?}{\underset{?}{|}}$ 4,00,000 and $\stackrel{?}{\underset{?}{|}}$ 2,00,000 respectively. Besides his capital Shiv had given a loan of $\stackrel{?}{\underset{?}{|}}$ 75,000 to the firm. Their partnership deed provided for the following:

- (i) Interest on capital @ 9% p.a.
- (ii) Interest on partner's drawings @ 12% p.a.
- (iii) Salary to Rudra ₹ 30,000 per month and to Dev ₹ 40,000 per quarter.
- (iv) Interest on Shiv's loan @ 9% p.a.

During the year Rudra withdrew ₹ 50,000 at the end of each quarter; Dev withdrew ₹ 50,000 in the beginning of each half year and Shiv withdrew ₹ 70,000 at the end of each half year.

The profit of the firm for the year ended 31-3-2022 before allowing interest on Shiv's loan was 7,06,750.

- 14. How much amount of net profit will be transferred to Profit and Loss Appropriation A/c?
 - (a) $\mathbf{7},06,750$

(b) ₹ 7,02,250

(c) ₹ 7,00,000

(d) ₹ 7,13,000

1

1

- 5. What will the amount of interest on drawings of the partners?
 - (a) Rudra ₹ 2,250; Dev ₹ 4,500 and Shiv ₹ 2,100
 - (b) Rudra ₹ 9,000; Dev ₹ 9,000 and Shiv ₹ 4,200
 - (c) Rudra ₹ 4,500; Dev ₹ 4,500 and Shiv ₹ 2,100
 - (d) Rudra ₹ 24,000; Dev ₹ 12,000 and Shiv ₹ 16,800

16. **Assertion (A)**: Under the fluctuating capital method, the balance in the capital account fluctuates from time to time.

- **Reason (R):** Under the fluctuating capital method, all the adjustments such as share of profit and loss, interest on capital, drawings, interest on drawings etc. are recorded directly in the capital accounts of the partners.
- (a) (A) is correct but (R) is wrong.

| 1    | You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.                                                                     |
| 2    | "Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, Evaluation done and several other aspects. Its' leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in News Paper/Website etc may invite action under various rules of the Board and IPC." |
| 3    | Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one's own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and due marks be awarded to them.                                        |
| 4    | The Marking scheme carries only suggested value points for the answers  These are in the nature of Guidelines only and do not constitute the complete answer. The students can have their own expression and if the expression is correct, the due marks should be awarded accordingly.                                                                                                                                                                                                |
| 5    | The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. If there is any variation, the same should be zero after delibration and discussion. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.                |
| 6    | Evaluators will mark( $\sqrt{\ }$ ) wherever answer is correct. For wrong answer CROSS 'X" be marked. Evaluators will not put right ( $\sqrt{\ }$ )while evaluating which gives an impression that answer is correct and no marks are awarded. <b>This is most common mistake which evaluators are committing.</b>                                                                                                                                                                     |
| 7    | If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totaled up and written in the left-hand margin and encircled. This may be followed strictly.                                                                                                                                                                                                                                        |

| 8  | If a question does not have any parts, marks must be awarded in the left-hand margin and encircled.  This may also be followed strictly.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

Here graphing and presentation plays a key role. Due to shortage of time, detailed reports are not preferred by analysers. Charts seem to be the answer to this change in the need of |                                 |  |  |  |  |  |
