33. (A) Per capita income is the average income per head. It is not a true measure of development. This is because there are various aspects of development. For example, the per capita income does not tell income distribution. There might be huge gap in income despite the per capita income being high as is the case in Saudi Arabia. Income is an inadequate measure of the level of development, so health and education indicators have come to be widely used along with income as a measure of development. For instance, Human Development Report published by UNDP compares countries based on the educational levels of the people, their health status and per capita income. This is evident if we compare Haryana and Kerala on certain parameters. Though, Haryana has a high per capita income it ranks quite low on Human Development Index (HDI) as compared to Kerala. This is because Kerala scores high in education and public health.

OR

(B) Human Development Index was created to emphasise that people and their capabilities should be the ultimate criteria for assessing the development of a country not economic growth alone and rank countries based on the level of social and economic countries based on the level of social and economic development. The HDI makes it possible to track changes in development levels from time to time and to compare development levels in different countries. The concept of HDI goes beyond income and growth to cover overall development with the object of improving the conditions of people from all angles. The organisation that measures the HDI is the United Nations Development Programme. Three major indicators of the HDI are as follows:

(i) Health: Without proper health facilities, no matter how much a country earns, it will not be able to provide decent standard of living to its people.

(ii) Access to Education: It is measured by expected years of schooling of children at

school and mean years of schooling of the adult population. Over the past few decades, it has become an important factor in leading a quality life. So, if the country has become but the literacy rate is low, it cannot be considered developed.

(iii) Income: A decent standard of living is measured by per capita income. More than income, people want to have a secured life. A country should be able to provide its citizens a sense of security.

34. (i) Gandhiji considered non-violence as supreme dharma because it could unite all religions without a battle or a physical force.

(ii) People who believed in Gandhian philosophy of Satyagraha were known as 'Satyagrahis. Although it was a novel method, despite that people accepted, followed and participated in large scale.

This can be shown by the success of many Satyagraha movements at various places:

- Champaran Satyagraha, Bihar
- Kheda Satyagraha, Gujarat
- Ahmedabad mill strike, Gujarat
- Rowlatt Satyagraha
- Non-cooperation movement.

(iii) It was the battle through non-violence, which could be done by appealing to the conscience of the oppressor. People - including the oppressors - had to be persuaded to see the truth, instead of being forced to accept truth through the use of violence.

35. (i) Primitive Subsistence Agriculture is a slash and burn agriculture, also known as Jhumming in north-eastern states like Assam, Meghalaya, Mizoram and Nagaland and is based on shifting cultivation.
