

۲

## **Learning Objectives**

- To know about computers.
- To know about the history of computers.
- To understand the growth and development of computers.
- To understand the generations of computers.
- To understand the types of computers.
- To apply the knowledge of computer in various fields in our day to day life.

۲

# (Boys and girls of standard VI are playing in the playground).

۲

**Siva:** Hey Salim, I saw your father coming with a big parcel yesterday. I guess you could have bought a new television. Am I right?

**Salim:** It's not a television Siva. We bought a new computer.

**Malar:** Oh, I see. computer! I had seen it used in textile shop for billing.

**Selvi:** Malar, not only it is used in textile shops, but also in railway stations, banks, ATM's and in many places. It is used even in our local post offices.

Nancy: Hey! I have seen it in my school.

**Salim:** Is it only in your school? Nancy, I think your father is also having a computer.

**Nancy:** Is my father having a computer?! Without my knowledge? I am sure that my father does not have computer. He has only a mobile phone.

**Salim:** That's what I say. Your father's mobile phone is also like a computer.

**Nancy:** Oh no Salim? What do you mean? How can a mobile phone be compared with a computer? **Salim:** Nancy, we usually think that computer should be like a big TV and a box attached with it. But computers are available in different shapes. The works which are done with a computer can also be done using a smart phone. There may be difference in their speed, but their operations remain the same. The big computers are shrunk into small smart phones nowadays because of the technological development. Most of us think that smart phones are only to make calls because of its handy look But it is not so.

**Selvi:** What about laptops and tablets? Are they same like the computers we usually think of?

**Salim:** Yes, they are all the same. There are different types of computers. But their performance vary according to their capacity.

**Siva:** That's ok Salim, why do you need a computer in your home? What will you do in that?

**Salim:** I can use it to draw, paint, play games and I can learn and develop my general knowledge.

**Selvi:** Salim, you know more about computers!

**Salim:** I know very little about computers. As my father uses computer in his office, he knows much about it. I shared very little of what I have learnt from my father.

# (All the children stood up when the teacher came and stood near them)

#### Teacher: What is going on?

**Children:** We are discussing about the computer sir.

**Teacher:** Oh, I see, that's nice. I will explain about computers in detail. Firstly I will explain you, what is a computer? Computer is an electronic device that processes the data and Information according to our needs. We can save the data and convert it into information. Computers are used in many ways.

**Malar:** We are eager to know who invented the computer.

**Teacher:** In the beginning of the 19<sup>th</sup> century, Charles Babbage, a professor in Mathematics designed an analogue computer. He is known as the father of computer.

The basic structure designed by him is being used in all computers. Similarly, Augusta Ada Lovelace is admired as the first programmer as she developed essential commands for the mathematical operations.

**Nancy:** Sir, can you tell us which device was used before the invention of computer?

**Teacher:** In the early stage, there was no computer. Initially the people used a tool called abacus for calculations.

			000	
			xxxxxx xxxxxx	
	2	<b>0</b> 00000 00	00000	000
0000000 000	Ì		00000	
	0	00	00000	0000
	ą	0000	100	m

Later, they started using a device called calculator for calculation.

**Selvi:** Wow! It's really interesting sir. Then, when did computers come into use Sir?

**Teacher:** Good question Selvi. Computer didn't come directly from abacus. The computers that we use today belongs to fifth generation.

**Nancy:** Oh! Were there four more generations previous to this?

**Teacher:** Yes Nancy, you are correct.

**Siva:** Sir! Can you explain us about the five generations?

Teacher: Sure, I can explain.

- In the First generation computers, Vacuum tube was used.
- In the Second generation computers, they used Transistor.
- In the Third generation computers, they used Integrated Circuits.
- In the Fourth generation computers, they used Micro processor.
- In the Fifth generation computers Artificial Intelligence is used.

**Selvi:** Sir, we are eager to know more about the present computers which we use.

**Teacher:** Data and information are the two important elements in computers.

Malar: Sir, what is meant by data?

**Teacher:** Data is the information that has to be processed. It cannot be used

6th Science\_EM\_Unit 7.indd 98

directly by us. Generally, they are in the form of numbers, alphabet and images.

Siva: Sir... then what is information?

**Teacher:** Information is a form of processed data.

Siva: What is software and hardware, Sir?

**Teacher:** The commands or programs that are used in computer are called software. This software can be divided into two types.

1. Operating software

2. Application software. ಶ Windows

**Nancy:** What is Operating Software?

**Teacher:** Software that is used to operate the computer is called operating software. I think you are familiar with Windows and Linux

Siva: Then, what is application software?

**Teacher:** Application software is a software that is used to run a particular

program. For example, the software used for painting, playing games in computer.

**Nancy:** Oh! I have learnt much information about computers today sir!.

Malar: Ok Sir, then what is hardware?

**Teacher:** The parts that are available in the computer that helps the software to work is a hardware.

Salim: Sir, please tell us more about it

**Teacher:** Yes, sure I will. Whatever we want to send to a computer is sent through a device called input device. For example, the keyboard, mouse and other input devices.

The data or information that has been sent to the computer are displayed out or reproduced through some devices. These are called as output devices. For example, printer, monitor and so on.

Nancy: Ok Sir, then what is CPU?

**Teacher:** It is the central processing unit. You will learn and understand more about CPU in your higher classes.

**All Children together:** Thank you so much, sir. Today we have learnt and understood more information about computers.

۲

 $( \bullet )$ 

## **Evaluation**

#### I. Choose the correct answer.

- 1. Who is the father of computer?
  - a. Martin Luther King
  - b. Graham Bell
  - c. Charlie Chaplin
  - d. Charles Babbage
- 2. Which of the following is another form of computer?
  - a. Blackboard b. Mobile
  - c. Radio d. Book
- 3. When was the first computer introduced?
  - a. 1980 b. 1947
  - c. 1946 d. 1985
- 4. Who is the computer's first programmer?
  - a. Lady Wellington
  - b. Augusta ado Lovelace
  - c. Mary Curie
  - d. Mary Comb
- 5. Pick out the odd one.
  - a. Calculator b. Abacus
  - c. Flash card d. Laptop

### II. Fill in the blanks.

- 1. Data is \_\_\_\_\_\_ information.
- 2. World's first general purpose computer is \_\_\_\_\_
- 3. Information is \_\_\_\_\_ data.

- 4. Fifth generation computer has \_\_\_\_\_\_ intelligence
- 5. \_\_\_\_\_ is the device that uses Index number.

#### **III. State True or False.**

 $( \bullet )$ 

- 1. Computer is an electronic device.
- 2. Sir Isaac Newton invented computer.
- 3. Computer can do calculations fast.

#### **IV. Match the following.**

First generation	_	Artificial
computer	-	Intelligence
Second generation	_	Integrated
computer	-	Circuit
Third generation		Vacuum tubos
computer	-	vacuum tubes
Fourth generation		Transistor
computer	-	TIATISISLOI
Fifth generation		Micro processor
computer		micro processor

### V. Answer briefly.

- 1. What is a computer?
- 2. Who are the pioneers / forerunners of computer?
- 3. Write a short note on Data.
- 4. Name any four input devices.
- 5. Differentiate hardware and software.

### **VI.** Answer in detail.

1. Explain in detail above the applications of computer.

100
