Question 7:

Several poor people in the city work as domestic servants as well as work for the Corporation, keeping the city clean. Yet the slums in which they live are quite filthy. This is because these slums seldom have any water and sanitation facilities. The reason often given by the Municipal Corporation is that the land in which the poor have set up their homes does not belong to them and that slum-dwellers do not pay taxes. However people living in middle class neighbourhoods pay very little in taxes compared to the amount of money the corporation spends on them in setting up parks, street lighting facilities, regular garbage collection etc. Also as you read in this chapter, the property taxes collected by the Municipality makes up only 25-30 per cent of its money. Why do you think it is important that the Corporation should spend more money on slum localities? Why is it important that the Municipal Corporation provide the poor in the city with the same facilities that the rich get?

Answer 7:

- Government should spend money on slum areas as they are also a part of society. If government does not do so it is straight away discrimination of economic basis.
- The people living nearby slum areas give taxes levied on them. Not providing facilities to slum areas affects the life style of the neighbouring societies who give taxes.
- Diseases from the slums can pass to their neighboring societies
