The Editor,

The Tribune,

Chandigarh.

Sir,

Kindly permit me to express my concern on the increasing number of crimes in society during the past few years.

The crime graph in the country has been recording a spurt for the last few years. Crimes against women and children have increased manifold during the recent past. This alarming rate of increase in crimes is a cause of concern for all right-thinking citizens in the country. Lack of moral educations, propagation of violence in violence in films and television serials, irresponsible police behavior and a desire for easy money or undeserved prosperity in life is some of the reasons that lead to crimes.

This situation must be tackled before it is too late. A multipronged strategy should be evolved to check crime in society. The public at large and the students in particular should be educated and told to respect the sanctity of life and individual liberty. The police force need to be educated to handle the situation intelligently and sympathetically. The media should be forced to play a responsible positive role.

I am sure things will improve before all is lost.

With thanks.

Yours faithfully,

XYZ.
