

1. Which of the following reactions will not occur? Why not?

2. Explain why metals do not liberate hydrogen gas from very dilute nitric acid.

---

3. Complete and the following equations :

4. Which non metal is used for vulcanisation of rubber?

---

5. Which non metal in its liquid form is used as a rocket fuel.

---

6. Which non metal is used as fungicide and in making gun powder.

---

7. Which non metal is used to preserve food materials.

---

8. Name a non metal which is used to make electrodes in dry cells.

---

9. Pratyush took sulphur powder on a spatula and heated it. He collected the gas evolved by inverting a test tube over the burning sulphur. What will the action of this gas on :

(i) Dry litmus paper?

(ii) Moist litmus paper?

Write the balanced chemical equation for reaction taking place.

---
