

Describe a school atlas book

or

A school atlas

A school atlas presents diagrams and texts, basic geographical ideas and terms. They provide useful and correct data about India and other countries. The atlas is followed by colored maps which give details. This includes maps of India, the continents and the world. It is equally useful to other man interested in the world and things around him. It gives useful information regarding minerals, world airways, rainfall, population, temperature, geology, great cities of the world, physical features, vegetable, agriculture, great cities of world and temperature. It helps us increase our knowledge.
