Ayan, Madhab and Neela collected mangoes, berries and poniyal respectively from the garden. Now let's see who have collected how many fruits.

Name	Fruits	Number
Ayan	Mango	9
Madhab	Berries	15
Neela	Poniyal	10

* Between Madhab and Neela who has collected more fruits?

* Between Ayan and Madhab who has collected more fruits?

* Between Ayan and Neela who has collected more fruits?

* Who has collected the highest number of fruits among the three?

* Who has collected the least number of fruits among the three?

Look at the picture and count the insects and complete the table—

Name	Butterfly	Honeybee	Ant
Number			

* How many ants and honeybees are there in total?

* How many butterflies and ants are there in total?

* Name the insect which is highest in number.

* Name the insect which is least in number.

Look at the picture and answer–

✳ How many cranes are there?

✳ How many ducks are there?

✳ How many kingfishers are there?

✳ Which bird is highest in number?

✳ How many cranes and ducks are there?

✳ How many birds are there in total?
