DIRECTIONS (Qs. 28-30): Study the following information to answer the given questions:

A word and number arrangement machine when given an input line of words and numbers rearranges them following a particular rule. The following is an illustration of input and rearrangement.

(All numbers in these questions are two digit numbers)

Input: 16 today 32 waiting 21 are 11 people 46 bus 66 long

Step I: 16 today 32 waiting 21 11 people 46 bus 66 long are

Step II: 16 today 32 waiting 21 people 46 bus 66 long 11 are

Step III: 16 today 32 waiting 21 people 46 66 long bus 11 are

Step IV: today 32 waiting 21 people 46 66 long 16 bus 11 are Step V: today 32 waiting people 46 66 21 long 16 bus 11 are

Step VI: today 32 waiting 46 66 people 21 long 16 bus 11 are

Step VII: today waiting 46 66 32 people 21 long 16 bus 11 are

Step VIII: waiting 46 66 today 32 people 21 long 16 bus 11 are

Step IX: waiting 66, 46 today 32 people 21 long 16 bus 11 are

Step X: 66 waiting 46 today 32 people 21 long 16 bus 11 are Step X is the last Step of the arrangement of the above input as the intended arrangement is obtained.

Now, answer the questions based on the following input.

Input: 23 you 13 wake 81 me 43 before 72 go 34 up

- 28. Which of these words / numbers would be fourth (from left side) in step IV for the input
 - (a) me
- (b) 48
- (c) 81
- (d) wake
- (e) None of these
- The following stands for which step of the reaarrangement? you wake 81 43 72 34 up me 23 go 13 before
 - (a) Step IX
- (b) Step IV
- (c) Step VI
- (d) Step V
- (e) None of these
- Which of the following would be Step II for the above input?
 - (a) 23 you wake 81 me 43 72 34 up go 13 before
 - 23 you 13 wake 81 me 43 72 go 34 up before
 - 23 you wake 81 me 43 72 go 34 up before 13 (c)
 - (d) 23 you wake 81 me 43 72 go 34 up 13 before

Cardiovascular disease is so prevalent that virtually all businesses are likely to have employees who suffer from, or may develop, this condition. Research shows that between 50-80 percent of all people who suffer a heart attack are able to return to work. However, this may not be possible if they have previously been involved in heavy physical work. In such cases, it may be possible to move the employee to lighter duties, with appropriate retraining where necessary. Similarly, high-pressure, stressful work, even where it does not involve physical activity, should also be avoided. Human Resource managers should be aware of the implications of job roles for employees with a cardiac condition.

DIRECTIONS (Qs. 126-140): Read the following passage carefully and answer the questions given below it.

Certain words have been printed in bold to help you locate them while answering some of the questions.

Indeed the western recession is really the beginning of good news for India! But to understand that we will have to move away for a while from the topic of western recession to the Japanese recession! For years the Japanese style of management has been admired. However, over the last decade or so. one **key** question has sprung up 'if Japanese management style is as wonderful as described then why has Japan been in a recession for more than a decade?'

The answer to this question is very simple. Culture play a very important part in shaping up economies. What succeeds in one culture falls in another. Japanese are basically no materialistic. And however rich they become unlike others, they cannot just keep throwing and buying endlessly. And once they have everything they need; there is a saturation point. It was only when companies like Toyota realized that they cannot keep selling cars endlessly to their home market that they went really **aggressive** in the western markets - and the rest is history. Japanese companies grew bigger by **catering** to the world markets when their home markets shrunk.

And the markets have to shrink finally after attaining a level of affluence! And that's great for the world because earth needs sustainable development. It does not need monstrous consumers who keep consuming at the cost of the environment and the earth. There should be limits to growth so that consumers are not converted into material dustbins for the profit of a handful of corporations.

·-· - -p--······ (····/ -····-- -^···

Owing to the materialistic culture elsewhere, it was possible to keep selling newer products to the consumers despite having existing ones which served equally well. They were lured through advertising and marketing techniques of 'dustbinisation' of the customer; and then finally, once they became ready customers, they were given loans and credits to help them buy more and more. When all the creditworthy people were given loans to a logical limit, they ceased to be a part of the market. Even this would have been understandable. If it could work as an eye opener. Instead of taking the 'Right Step' as Toyota did, they preferred to take a 'shortcut'. Now banks went to the non creditworthy people and gave them loans. The people expectedly defaulted and the entire system collapsed.

Now like Toyota western companies will learn to find new markets. They will now lean towards India because of its common man! The billion plus population in the next 25 years will become, a **consuming** middle-class. Finally, the world's attention will shift to the developing world. Finally, there will be a real **surge** in income of these people and in the next fifty odd years, one can really hope to see an equal world in terms of material plenty, with poverty being almost nonexistent! And this will happen not by selling more cars to Americans and Europeans. It will happen by creating markets in India. China, Latin America and Africa, by giving their people purchasing power and by making products for them.

The recession has made us realize that it is not because of worse management techniques, but because of limits to growth. And they will realize that it is great for planet earth. After all, how many cars and houses must the rich own before calling it enough? It's time for them to look at others as well. Many years back, to increase his own profits. Henry Ford had started paying his workers more, so that they could buy his cars. In similar fashion, now the developed world will pay the developed world will pay the developed world people so that they can buy their cars and washing machines.

The recession will kick-start the process of making the entire world more **prosperous**, and lay the foundation of limits to growth in the west and the foundation of real globalization in the world – of the globalization of prosperity. And one of its first beneficiaries will be India.

- **126.** What does the author mean by the "Right Step" in the passage?

100. (a) Let the principal be \mathbb{Z} x, then

$$x\left(1+\frac{15}{100}\right)^3 - x = \frac{650052}{100}$$

$$\Rightarrow x \times \frac{23}{20} \times \frac{23}{20} \times \frac{23}{20} - x = \frac{650052}{100}$$

$$\Rightarrow 12167x - 8000x = \frac{650052 \times 8000}{100}$$

$$\Rightarrow x = \frac{650052 \times 8000}{100 \times 4167} = 156 \times 80 = ₹ 12480$$
