## Root Words and Base Words

- The root word and the base words are the parts which contain the primary meaning of the word.
- Prefixes and suffixes are added to root and base words to create new words and ideas.

### Root Word

- A root word cannot stand on its own as an independent word.
- It needs the addition of the prefix or the suffix for the completion of its meaning.
- For example, let us consider the words **amphibian**, **regeneration** and **subtraction**.

<b>amphi-</b> prefix	<b>-bi-</b> root	<b>-an</b> suffix
-------------------------	---------------------	----------------------

<b>re-</b> prefix	<b>-generat-</b> root	<b>-ion</b> suffix
----------------------	--------------------------	-----------------------

<b>sub-</b> prefix	<b>-tract-</b> root	<b>-ion</b> suffix
-----------------------	------------------------	-----------------------

- In the above cases, the roots **-bi-**, **-generat-** and **-tract-** cannot stand alone as individual words.
- They are therefore known as root words.

## Base Word

- A base word, unlike a root word, can stand on its own like an independent word.
- It does not need the addition of the prefix or suffix in order to function as a stand-alone word.
- For example, let us consider the words **redone**, **nonviolent** and **unmoved**.

<b>re-</b>	<b>done</b>
prefix	base word

<b>non-</b>	<b>violent</b>
prefix	base word

<b>un-</b>	<b>moved</b>
prefix	base word

- In the above examples, done, violent and moved can function as independent words.

## How to Use the Affixation System

- Thorough knowledge of the English affixation system helps us in guessing the meaning of the word purely by the means of its **Prefix-Root-Suffix** structure.
- Because of the limitations of our memory, it is not easy to mug up a large number of words at a time.
- We may find it difficult to associate the meaning of the word with its structure.

Word	Meaning
innocuous	harmless
unanimous	together in agreement
translucent	allowing light to pass

- With the knowledge of the affixation system, we can guess the meaning of the given word.

Prefix	Root	Suffix	Meaning
in- (not)	noc- (harmful)	-uous (having the quality of)	<b>not harmful</b>
uni- (one)	-anim- (war)	-ous (belonging to)	<b>with a single mind (unitedly)</b>
trans- (talk)	luc (light)	-ent (quality of)	<b>light passing across</b>

In this manner, we can guess the meanings of the words solely by the virtue of their roots.

Thus, in order to have a rich vocabulary, students should learn the **Prefix-Root-Suffix** method. It is an interesting way to expand your vocabulary with a little effort. Students who are well-versed with the affixation system find it easier to tackle difficult words and are more confident about their word usage. It will definitely give you an edge over the others when it comes to vocabulary.
