

Bank Robbery

Bank Robbery is very common now-a-days. Some people do such crimes just for sake of money. It was March 03. 2016 when my father had to go to the bank in order to encase one of his fixed deposits. He decided to take me along as my school was closed for summer vacation.

It took us bout twenty minutes to reach the bank. My father told to me seated on the sofa lying near the door and he proceeded to the "FIXED DEPOSIT" counter. People all around were busy in depositing and withdrawing money. Suddenly a car same and stopped near the entrance of the bank. In few seconds, four masked men with weapons entered the bank. They hit the security guard badly and after that took positions and warned the people of dire consequences if they tried to move. They told everyone to raise hands and turn their faces towards the wall. Everybody was filled with fear and terror.

Two of than men went to the Manager's office and demanded the kits to the strong room; they had snapped the connections of all the telephones. The robbers then entered the strong room and instructed the cashier to open the cash box. They took all the cash and filled it in the bags.

Then, hurriedly all the robbers left the bank and warned everyone that it anyone tried to follow, they would kill him, they escaped from, there in a few minutes. The whole operation took not more than ten minutes. After their escape the Bank Manager sounded the siren and within a few minutes the police arrived the bank. All the people in bank were stunned.
