All the Best

SPORT AS AN AGENT OF SOCIAL CHANGE

Mexico 1968 olympics witnesses a remarkable episode that serve as a watershed moment in the history of Sport. Tommy Smith & Carlisle White, two black American athlete, after winning medals at the olympic choose to protest through black power slogan by raising their hand during the prize ceremony. They protested against racial injustice, Segregation and lack of political equality in the united States.

There actions were criticised heavily by the olympic and

The United State media. They were ostracised, humiliated and threatened for standing up against injustice, hatred and bigotry. ~~But~~, ~~their~~ But their courageous act of protest lead to change in the race relation, in the United States & world alike. Olympic apologised to them. ~~They~~ ~~have~~ in 2008, 50 year after the incident for the mistreatment.

This powerful example shows how Sport ^{can} act as a powerful tool to change & transform the world.

Social change is the change in the social relationship, social institution and social behaviour. Sport has a transformative

Power to alter the society & march toward progress.

Sports & Character Building

→ Sports is not just an expression of innate physical ability. But it is the ~~an~~ exemplification of the qualities of hardwork, dedication, team spirit, never die attitude.

It instils in an individual the basic truth of life: that everyone is equal irrespective of birth, place, caste, religion etc". Spirit of equal treatment is central to Sport.

It does not matter who you are, where you are from, rich, poor → everyone is alike.

For instances Sportsmen at the

highest level shows impeccable integrity, Commitment to ideals of sporting spirit. and attitude of never accepting defeats and overcoming adversity at face of defeats.

→ Such Qualities if integrated and assimilated in the psyche of our citizen can lead to a transformative change. As Gandhi said " Be the change you want to see in the world".

An ethical and Char impeccable character is need of our society and Sport ~~cc~~ can definitely act as an agent to instill integrity, impartiality, honesty, and discipline

Sports & Societal Welfare

→ Society welfare depends upon the Social solidarity, peace, harmony, Kindness etc.

Sport has a extraordinary power to build tolerance, solidarity and unity.

For example, the resurgence of Afghanistan cricket team brings hope, unity & tolerance among the disunited groups. They shed their difference and come together through the spirit of game.

Sport can be use to break barriers, racism, hatred, bigotry etc.

For example, Jessy owen, A black American won the olympic medal in 1936 Nazi Germany in face of a hostile crowd. His achievement stands as an example of the

Power Sport can have to ~~change~~
 stood against ignorance, intolerance,
racism etc.

In India for instance ^{of} cricket
 nationalism bring everyone together
 with a spirit of brotherhood irrespective
 of religion; caste and geography

→ Recently concluded ⁱⁿ 2017 under-17
 football world cup had 8 manipuri
 player in India football team. ~~A~~
 It lead to emotional unification of
 people across the geographical corner.
 It shows that even the remotest
~~for~~ area has representation in sport
 thus attaining the ideals of
equality.

SPORT & GENDER relations

→ Sport has been only of the
 biggest tool to breakdown
 gender stereotype and injustices

Sport pioneers like Sania Mirza, Mary Kom, Phogat sisters etc has lead to change in the course of gender role in the society.

Sport has been able to attack the patriarchal structure paving the way for the girl to come out and participate in public life.

It has been able to counter stereotype like "weak women", "housewife role", "impure" etc. and instill a spirit of gender justice and thereby bringing social change.

Sports & International Relations,
Politics, and World Peace

Sport diplomacy is the use of sport to build bridges, and relations among different countries.

for example India - and Pakistan
uses cricket diplomacy to mend
the relationship between the two nations.

Sporting event acts as an avenue
for people of all background to
explore different culture, and
societies. For example, olympics
held in South Africa gave an
opportunities for people across the
world to visit and experience
different culture. It leads to
overcoming prejudices, stereotype etc
and enable us to build trust,
peaceful co-existence and relate
to each other.

Sport & Health

→ Sport has always been associated
with changing one behaviour and
attitude toward health.

It instill strength, conditioning and

fitness in individual. As the saying goes health is the wealth. Sport can address the challenge of lifestyle diseases like diabetes, cardiovascular diseases, obesity etc.

IMPEDIMENT TO SPORT AS AN AGENT OF SOCIAL CHANGE

→ Unfortunately today, Sport at times has assumed a role of exhibitionism.

Today there has been commercialisation, corporatisation and commodification of Sport.

As a consequence the greed of winning leads to unethical conduct like bribery, match fixing, discrimination etc. For example, Steve Smith & David Warner, the Captain and vice Captain of Australian cricket team were caught for trying to

tamper ball.

Such Behaviour send a bad signant to young children & Society alike.

In India unfortunately, the infrastructure of sport is very poor. It is reflected in the abysmal performance of India in olympics where we were able to win only 1 medals.

Further, the attitude toward sport is also negative in India. It is often equated with "wasting time". As a result parent often doesn't support as a profession. An attitude change is need of the hour.

Thus, Countries Need to look at sport through different angle. Sport are an effective instrument that can help improvement and

development of our children,
families and countries in general

Each country need to tailor its
programs in order to focus on its
particular problem and obtain
the result.

The results of will be in long
term. They will not necessarily
consist of an individual standing
on a podium receiving a medal,
But an entire generation of good
citizens, prepared with the necessary
competencies to face their country's
present & future challenge.

"Education is not the Preparation
for life, ~~But~~ Education is life itself"

At the entrance & gate of a
university in South Africa the following
message was posted for Contemplation:

"Destroying any nation doesn't require
the use of atomic bombs or the use of
long range missiles. It only requires
lowering the qualities of education and
allowing cheating by the students."

Patient die at the hand of such doctors
Building Collapse at the hand of such
engineers.

Money is lost at the hand of such
economist and accountants.

Humanities dies at the hand of
such religious scholars

"The collapse of education is the collapse of nation"

The above message aptly exemplify and underscore the importance of education in the overall welfare of an individual, society, nation and the world.

The quote by John Dewey "Education is ~~the~~ not the preparation for life, Education is life itself" stressed the importance of education based on equity, value, qualities and universality in order to create a meaningful existence

Gandhiji stated "Education that does not mould the character on an individual is ~~no~~ No education at all". Knowledge plus Character is the goal of Education.

Education is not just collection of Knowledge and preparation for a career but the end product of

Call us : 8468022022

education is a creative man, who can solve the problems life throws at him/her.

education is Not just what some one learn in a classroom but it is about application of the education & knowledge to solve the real issues in life. Today the issue that we faces like Climate changes, wars, ethnic tensions, Corruption, Inequalities etc are manifestation of failure of value education

Too much focus on material achievement leads to means often compromise. In strive for success, the "Educated" often succumb to greed and indulges in corruption, fraud, cheating etc.

Helen Keller said that the highest form of education is tolerance. With education man can learn lifelong

Lesson and value : The value of
friendship, loyalty, tolerance, Humility,
Kindness etc.

The destiny of a nation is shaped
in its classroom. Classroom is where
the future leader of the society
studies. It is imperative that
we focus on ideals of honesty,
impartiality, kindness, commitment
to constitutional values, impeccable
integrity etc are integrated into
the curriculums.

As the saying goes, school is
a four wall where the future
resides. A quality teacher and
school determines how ~~school~~ education
shaped the destiny of our nation.

Education gives power. Knowledge.
With Knowledge An individual can
decide what is right & wrong.

Education Key to transform our
Society from a hierarchical one
to one where norms is equality
of opportunities.

Education is the life itself as
it gives man self confidence, face
adversity with hope and determination.
No matter what, an educated individual
would not remain passive in case of
injustice.

Welfare of the society depends upon
the ethics of its members. Education
based on an ethical framework is a
counterbalance to the issue of
dishonesty, disloyalty and disorder.
As C.V Lewis said "Education without

value make man more of a clever
devil". Cases of financial repression
in 2008 has been due to the
declining moral fibre.

Gandhiji introduced the Nai talim
which combined formal school with
vocational activities. It instilled self
confidence, respect for the virtue of
work and education. Such an education
is need of the hour as the employability
and skills of today's education is
declining unfortunately.

Unfortunately today education has been
commercialised and commodified as
a profession rather than a service.

Many issue plagued the and acts
as impediment to the role of education
as a transformation agent.

Access to education is sharply divided on the basis of class and caste. Further there is urban-rural divide in terms of access to education.

Lack of infrastructure like schools, quality teachers and other resources impedes the potential of our youth and intensifies inequalities.

Further, too much pressure on children due to rat race and rote learning kills Creativity and Innovation. It pressurise the child and ~~is~~ destroyed their potentials.

Teacher A society is as good as its teacher. However, dearth of Quality teacher leads to inability to tap the human resources of our young population. Ineffective Curriculums.

Further,
it is ~~see~~ treated as a means
to achieve a job - rather than
a meaningful life experience. Focus
on quantity over quality, data
over outcomes impedes in treating
education as a life itself.

→ Malcolm X famously said "Education
is the passport to future, future
belong to those who work for
it today". We as a nation
need to transform our education:
Curriculum, teacher, school infrastructure,
etc.

• Access to quality education is an
inalienable right of an education. It
is indispensable to create a meaningful,
creative, and empower citizenry.

An aware citizenry is perfect tool to ensure that the Government does not stray from the ideals of good governance.

Education is what remain after you forget what you learn in the classroom. It is the ability to ~~write to~~ change ~~en~~ built a healthy social relationship, ensure equality of opportunities, building an environment that encourage everyone to reach their truest potential.

As can be seen in Scandinavian Country, quality education serve as a tool to attain meaningful democratic institution which respect human right, protect freedom of expression etc.

→ Gandhiji dream of Poorna Swaraj:
Complete freedom from poverty,
illiteracy, diseases, hatred, intolerance
can only be achieved if we use
education as a life itself. A means
to transform the character, behaviour,
attitude, mindset etc of an individual.

The goal of education is to gather
knowledge and disseminate truth,
honesty, kindness, creativity and
innovation. Our future: A nation of
beautiful people who are treated equally
irrespective of race, religion, caste etc
depends on how we maximise
and direct our education.
