

### Introduction

**Definition:** The voice is the form of verb which indicates whether a person or ' thing does something, or whether something has been done to a person or thing.

### Look at the following sentences:

- ❖ I write a letter.
- ❖ A letter is written by me.

Both the sentences given above have the similar meaning. But in the first example subject works itself, whereas in second example the object is used as subject.

### There are two kinds of voice.

- ❖ Active voice
- ❖ Passive voice

### Active voice

When the subject (person or thing) is the doer of an action/the form of the verb is said to be in active voice.

- ❖ Rocky helps Maya.
- ❖ Riya is helped by Robin.

#### See the difference between these two sentences.

In the first sentence, the form of the verb shows that the subject Rocky is doing something. He is the doer of the action. In other words, it can also be said the subject is active. So the verb form 'help' is said to be in active voice.

### Passive voice

When the subject (Person or thing) is the receiver of an action, the form of the verb is said to be in Passive Voice.

- ❖ Rocky helps Maya.
- ❖ Maya is helped by Rocky

#### See the difference between these two sentences

In the second sentence, the form of the verb shows that the subject Maya is the receiver of the action or something is done to the subject. In other words it can also be said that the subject is not Active hut Passive. So the Verb form ('s helped is said to be in passive voice.

Therefore, active voice is a direct way to show an action whereas passive voice is an indirect way to show action.

#### NOTE:

- ❖ Voice is that form of verb which shows whether the subject is doer of the action or receiver of the action.
- ❖ Voice change is the change in the structure of a sentence.

- ❖ There is no change in the meaning of the sentences in their Active and Passive Voice form.
