

**Time allowed: 3 Hrs.**

**Maximum Marks: 80**

**General Instructions:**

1. 15-minute prior reading time allotted for Q-paper reading.
2. The Question Paper contains THREE sections-READING, GRAMMAR & WRITING and LITERATURE.
3. Attempt questions based on specific instructions for each part.

**Section A**

**1. Read the text carefully and answer the questions:**

**[10]**

1. Diabetes is a metabolism abnormality that affects the way your body uses blood sugar (glucose), your main source of energy. To understand diabetes, you have to start from the beginning - with food. Your body converts a portion of the food you eat and digest into glucose. Glucose is then absorbed into your bloodstream, where it can enter the individual cells of tissue throughout your body to be used as energy. Before your cells will let glucose in, however, they need the help of insulin.
  2. Insulin is a hormone produced by your pancreas - a gland located just behind your stomach. Normally, insulin acts as a master key, unlocking the doors of your cells and allowing glucose inside. To simply maintain this process, such as at night when you're asleep, the pancreas releases a low level of insulin on a constant basis. When necessary, such as after a meal, your pancreas increases insulin supply to meet demand.
  3. After you eat a meal or a snack, your pancreas releases more insulin to make sure the extra glucose in your bloodstream can enter your cells. If you have more glucose than you need, your body can remove the excess from your blood and store it in your liver and muscles or convert it to fat. Then, when you run low on fuel, your body can release this stored energy back into your bloodstream, where insulin is waiting to usher it into your cells.
  4. If you have diabetes, this whole process goes awry. Instead of entering cells throughout your body, excess glucose builds up in your bloodstream and some of it may eventually be excreted in your urine. This can happen when your pancreas doesn't produce enough insulin (Type 1 diabetes), when your cells have become resistant to the effects of insulin (Type 2 diabetes) or, more commonly, when both of these problems occur.
- (i) Give one conversion function of our body, based on information in paragraph 1.
- (ii) Select the appropriate option to fill in the blanks based on paragraph 1.  
When \_\_\_\_\_ is ingested, it enters our bloodstream and goes to all of the tissue cells in our body where it can be used as \_\_\_\_\_.  
(1) Glucose (2) Insulin (3) Fat (4) Energy (5) Metabolism  
a. 2,3

b. 1,4

c. 4,5

d. 5,3

- (iii) Complete the following analogy correctly with a word/ phrase from paragraph 1.

Water: Absorbed in Soil :: \_\_\_\_\_ : Absorbed in bloodstream.

(Clue: Just like water is absorbed in Soil, similarly \_\_\_\_\_ is absorbed in bloodstream.)

a. Metabolism

b. Glucose

c. Insulin

d. Energy

- (iv) Select the correct option to complete the following sentence: (Paragraph 1).

Diabetes affects how our body uses our primary source of energy i.e blood sugar due to \_\_\_\_\_.

a. Lack of insulin and glucose

b. Process of glucose transmission

c. Abnormalities in our metabolism

d. Presence of high-level fats

- (v) From Paragraph 2, choose the option that best describes the organ that secretes insulin.

- (vi) Fill in the blank by selecting the correct option.

By opening the \_\_\_\_\_ doors and letting glucose in, insulin functions as a master key.

a. cell

b. pancreas

c. blood stream

d. vein

- (vii) Substitute the word 'excess' with ONE WORD similar in meaning, in the following, sentence from paragraph 3.

If you have more glucose than you need, your body can remove the **excess** from your blood and store it in your liver and muscles or convert it to fat.

- (viii) List any 2 organs of our body mentioned in Paragraph 3.

#### 15. Child Labour Across Ages

The results of the global estimates make clear that child labour remains an important concern across the spectrum of children aged 5 to 17. Of the 160 million children in child labour, 89.3 million are young children aged 5 to 11, 35.6 million are children aged 12 to 14, and 35 million are children aged 15 to 17. Child labour among children aged 12 to 14 and 15 to 17 continued to fall in both absolute and percentage terms over the last four years. By contrast, the 2016-2020 period saw a worrying rise in child labour among young children aged 5 to 11.

In 2016, there were signs of slowing progress among young children. Today the trend line is moving in the wrong direction. The reason for backtracking is not clear and needs to be investigated as a priority. Hazardous work accounted for about two fifths of the total number of additional children aged 5 to 11 in child labour during the four-year period. While children of all ages must be protected from hazardous work, its persistence and now growth among younger children is a particular concern.

OR

The given pie chart illustrates the frequency of usage or popularity of different platforms of social media amongst college students of India in 2019. We can clearly see the preference of the young people from this pie chart.

It is clearly evident from the pie chart that instagram is the most favourite amongst the young people with a whopping 34% using it. Closely followed by tiktok with 26%. The one social media platform with the least engagement from the young population of the country is Twitter with only about 8% using it regularly. Facebook and Quora have fairly the same amount of engagements taking up a decent 18% and 14% respectively.

Facebook beating quora by a mere 4% but given the fact that Quora is a new platform against the old and standard Facebook says a lot for its rising popularity.

Instagram and tiktok coming out as the most popular app gives us this impression that the young people of India prefer the visually driven apps with little or no room for writing think-pieces. The pie chart establishes that the youth is not keen on socially and politically engaging platforms like Twitter.

The Editor  
Times of India  
Chandigarh  
Sir,

**Subject: Dengue-Prevention is better than cure!**

In the past month, an alarming increase in the incidence of dengue cases in the city has been noticed which is a cause for extreme concern and demands the immediate attention of the Health Care department, Municipal Corporation as well as of the general public. Dengue is a viral infection is caused by a virus which cannot be treated with antibiotics. It is treated with under Doctor's supervision. precautions to prevent this terrible disease:

- i. Dengue spreads through mosquito bites. To stop the transmission from one patient to another individual, it is necessary to use mosquito nets at night
- ii. Mosquito eradication is necessary for indoors as well as in neighbourhood; thus spraying of mosquito repellant is necessary.
- iii. Limbs should be coated with mosquito repellant sprays and lotions.

High fever is a discernible symptom and may lead to complications due to lowering of the platelet count. Any bleeding during the infection would be difficult to control. Severe cases may require blood transfusions.

Since, the carrier mosquito breeds in stagnant waters, close to human habitations, cleanliness of the environment is immensely important and a key precaution for prevention. Vaccination is not an option and any previous infection does not guarantee immunity as there are numerous viruses that cause it.

Awareness is immensely important to initiate preventive measures. I hope my letter will be published for the common good of the people.

Thanking you,  
Yours truly,  
Varsha.

**Subject: Complain against Water Leakage**

Sir,

I, on behalf of all the members of this colony, am writing this letter to you to complain about the current issue of water leakage from the taps and supply joints in our colony.

We have been facing this issue for last one or two weeks. The water is not getting supplied due to old and out dated disposal system of the colony. Summers are approaching and there is always a shortage of water and if so much water is wasted every day, it will create a big problem for the residents of the colony.

We shall be exceedingly thankful if the required repair and maintenance work in our colony is carried out at the earliest.

Thanking You  
Yours truly  
Sapna

My heart is filled with sadness as I think of the oppressed who had to tolerate the inhuman attitude of the oppressors in their own land. The oppression that the communities faced in South Africa under the apartheid regime reminds me the struggles and hardships of millions of Indians who fought against the oppressive British rule. The white regime in South Africa was based on racial discrimination. It symbolised exploitation and extraordinary human disaster. The blacks were deprived of their rights equality and human dignity. In the same way, the Indians were exploited by the British. They worked in the lands like animals who were only supposed to obey. Their lands, resources and approaches were captured by the British. The struggle of Indian under British rule resembles with the struggles of the people of South Africa under the apartheid regime. The struggle created a deep and lasting wound on them. But they never gave up their cause, ultimately, their sacrifices led to their victory- common victory of humanity for peace, for justice and for human dignity.

- (ii) **Anne:** Gosh! You do run off into some strange worlds, don't you?

**Amanda:** (Cnods!) Well... I do.

**Anne:** Is there anything wrong with you?

**Amanda:** No, I just want to be left alone. I want to be on my own.

**Anne:** Are you crazy? Children pine to be with their parents, friends and neighbours? Think of those orphans who have never enjoyed the love of caring mother and loving father.

**Amanda:** I don't know. But I don't like my mom consistently nagging me for my mistakes. I'm fed up of being watched by my parents continuously. I want to enjoy my freedom. I'm frequently scolded for eating too many chocolates as this may cause pimples.

**Anne:** I do understand that this constant nagging has made you so sad that now you

have even stopped to imagine yourself as someone else. But my dear, have faith in your parents. They want you to grow up as a responsible adult. They bear a great responsibility. It is their duty to teach you the rules of social conduct. I think, you need to talk to them regarding this.

21. Answer ANY ONE of the following in about 100-120 words.

- (i) When Bholi went to school and met her teacher, she was very shy and innocent. She didn't know anything about life's hardships. She had a lack of sense as she fell from a cot when she was ten months old and a part of her mind was damaged. This damaged her mind and could not speak until she was five years old. After five, she tried to speak but could not and only stammered. Due to the attack of smallpox-there were pock-marks all over her body. All others made fun of her. Bholi's teacher played an important role in changing the course of her life. She was polite and friendly which touched her heart. She encouraged her every time and was affectionate towards her. The teacher transformed her into a confident person who could read, write and speak clearly. This gave her the required confidence. Moreover, the teacher's appreciation and encouragement helped her overcome her low morale.
- (ii) Yes, Madam Loisel came to know the horrible life of necessity because after losing the necklace their life changed drastically. Matilda had to do all the household chores. She had to do away with her maid and carry down garbage to the street on her own. She had to wash the dishes and do all the shopping from the market with a lot of haggling. Her husband also had to work hard. Though she found it hard to accept the reality but in the end she knew she had to do all this in order to re-pay the money they borrowed.
